DIRECTORY of
CHEMICAL AND PHYSICAL
TESTING FACILITIES
# of ALBERTA

Alberta Research Council
1982

FOREWORD

This report is a survey of chemical and physical testing facilities in Alberta with both field and laboratory testing capabilities. In order to make this Directory more comprehensive, some firms included also provide inspections, surveys, and consulting services. Because the compilation is not necessarily complete, we would appreciate being notified of new tests, laboratories, or other material which should be included. Hopefully, any errors or omisions will be brought to our attention promptly in order to correct and clarify future issues.

This report has been prepared for information and record purposes only and is not to be cited as a reference.

General enquiries and suggestions for the improvement of this publication should be directed to:

Industrial Development Department
Alberta Research Council
4th Floor, Terrace Plaza
4445 Calgary Trail South
Edmonton. Alberta
T6H 5R7
Telephone: (403) 438-0666

Copies are available from:

Telephone: (403) 438-2250

Information regarding the chemical and physical testing facilities of Alberta is now available for online searching on SPIRES* at the University of Alberta in Edmonton. The use of SPIRES is free, except for the computer connect time which is billed directly to the user by the University. To apply for a computer account, contact the University of Alberta's computing services Department:

Computing Services
352, General Services Building
University of Alberta
Edmonton, Alberta
Telephone: (403) 432-2261

This printed version was published to serve the large number of companies without access to a computer terminal. In either access mode, this directory is becoming a helpful tool.

Index of materials tested vi
List of laboratories surveyed viii
Description of laboratories surveyed 1
List of tests and firms performing these tests 63

EXPLANATION OF ABBREVIATIONS AND CODES

There are basically three types of laboratories which have been surveyed.

Commercial Testing Laboratories

Tests are performed on a fee basis for any client

Private Testing Laboratories

Tests are performed primarily for the company owning the laboratory. The usual policy is to accept only those tests that are related to the ordinary business of the company. Only in exceptional cases, where the facilities of the laboratory are suited to offer a unique service, the company may accept tests for other concerns.

Government Testing Laboratories

The policy in this type of laboratory is to perform only those tests which cannot be done commercially. Charges for routine tests are comparable to those of commercial laboratories, and are usually payable directly to the institution concerned. Specialized tests of a research nature may be done gratis to afford information to the general public, but testing is not generally undertaken except on a fee basis, if the test benefits the client directly. There are two types of laboratories—one for the exclusive use of a government department, the other for service to the public.

SYMBOLS USED IN LIST OF TESTS DONE

(a) Tests are accepted here and forwarded to other laboratories for completion.
(x) Routine quantitative analysis is performed at this laboratory.
(s) Qualitative tests, or examinations are performed at this laboratory.

Description of Laboratories Surveyed

Government Testing Laboratory

AGRICULTURE CANADA
Food Production and Inspection Branch
Laboratory Services Division
Western Regional Laboratory
102- 11 Avenue S.E.
Calgary, Alberta
T2G 0X5

231-5741
R.T. Onciul, Acting Director.

The Western Regional Laboratory of Agriculture Canada is responsible for the regulatory analysis of animal feeds, fertilizers, pesticides, and food products to determine their compliance with the acts and regulations administered by the Department. Only official samples submitted by inspectors of the various commodity divisions of the Department are analyzed by the Laboratory. Occasionally, special analytical projects are undertaken in conjunction with the provincial government and universities. Although no analysis on a commercial basis is done, information is provided on official methods of analysis and occasional assistance is given if problems with analytical methods are presented by industry or commercial laboratories.

Fertilizers Act

Chemical analysis for guarantee verification of fertilizers for nitrogen, phosphoric acid, potash, and herbicides.

Feeds Act

Chemical analysis for protein, equivalent crude protein, pepsin digestible protein, fat, fibre, calcium, phosphorus, salt, iodine, fluorine, selenium, Vitamin A, trace elements, heavy metals, drugs, antibiotics, and mycotoxins. Microscopic analysis of feeds and feed ingredients for plant and animal derived components, drugs, minerals, and foreign substances. Microbiological analysis of feeds for Salmonella and other pathogens including Campylobacter.

Pest Control Products Act

Chemical analysis of registered pesticides for guarantee verification of their active ingredients. Chemical analysis on a variety of substances for pesticide residues on an investigation basis. Chemical analysis of registered pesticides for microcontaminants such as nitrosamines. Bioassay of antimicrobial products (disinfectants, sanitizers, etc.) for their microbial efficacy.

Processed Egg Regulations

Microbiological analysis of frozen and dried egg products for a variety of spoilage and pathogenic organisms, including Salmonella, and chemical compositional analysis of the above products for compliance with the grade standards. Microbiological analysis of procesing plant environment samples.

Dairy Product Regulations Processed Fruit and Vegetable Regulations

Chemical compositional analysis of cheese, butter, ice cream, concentrated milks, etc. with grade standards. Microbiological analysis of procesed dairy products for compliance with grade standards and for freedom from pathogenic micro-organisms including Salmonella. Microbiological analysis of processing plant environment samples.

Chemical compositional analysis of processed fruits and vegetables for such things as colouring agents, preservatives, moisture, sugars, solids, heavy metals, etc. and microbiological analysis of such products for spoilage and pathogenic micro- organisms and compliance with the grade standards.

Meat Inspection Act and Regulations

Chemical compositional analysis of prepared meats for moisture, protein, fat, dextrose, cereal, nitrate, nitrite, etc. for compliance with the standards.

Government Testing Laboratory

ALBERTA AGRICULTURE
Food Laboratory
Alberta Agricultural Regional Building
Postal Bag Service No.1
Airdrie, Alberta
T0M 0B0

948-5108
Dr. N.P. Tiwari, Head.

This laboratory provides a wide range of chemical, microbiological and organoleptical analyses, as well as research associated with new product development.

The main functions of this laboratory are:

1. To provide analytical and consulting services to the food industries in Alberta.
2. To safeguard the consumer and exporter by ensuring that food products produced in Alberta meet the quality and compositional standards established by federal, provincial, and other authorities.

3. To assist Alberta's food industry in the development of new foods from Alberta commodities and to improve existing products.
4. To provide analytical services to other provincial agencies whose programs are closely related to food production, quality, safety, contamination, sanitation and related matters.

These services are offered to producers, processors, exporters, government agencies and in some cases, the general public. The following tests are performed on foods and food products: moisture, fat, protein, carbohydrates, dextrose, ash, salt, curd in butter, pH, acidity, chlorine sanitizer level, certain additives (e.g. sulfite, nitrate, nitrite), certain mineral elements using atomic absorption spectrophotometer, rancidity of fat, fatty acid pattern using gas chromatography and freezing point of milk using milk cryoscope.

Government Testing Laboratory

ALBERTA AGRICULTURE
Plant Industry Division
Alberta Horticultural Research Center
Bag Service 200
Brooks, Alberta
T0J 0J0

362-3391
Mr. T. Krahn, Head, Laboratory Services.

Staff at the center provide highly specialized service and information on the traditional horticultural crops as well as grain legumes, annual forages, honeybees and leafcutterbees. The center also provides a diagnostic service for all forms of pests and diseases. As an adjunct to the research and advisory services on crops, there is scientific support in pathology, entomology, post-harvest physiology, storage, weed control, food science and technology.

Special testing equipment include: dissecting microscope, compound microscope, laminar flow hood, pH meter, conductivity meter, freeze drier, Niro atomizer, dehydrator, sieve shaker, Sweco Vibro energy separator, Instron texture tester, spectrophotometer, centrifuge, gas chromatograph, refractometer, and color analyzer.

Government Testing Laboratory

ALBERTA AGRICULTURE
Food Laboratory Services Branch
5th Floor, O. S. Longman Laboratory Building
6909 - 116 Street
Edmonton, Alberta
T6H 4P2

436-9450
Dr. V.W. Kadis, Director.

Consists of 3 sections: Food Microbiology, Food Chemistry - Pesticide Residues Centralized Milk Treating.

The laboratory is primarily for government agencies and provides service to the Alberta Food Industry. It conducts tests on: foods and food ingredients, milk and milk products, microbiological, compositional and chemical analyses, sensory evaluations, assists in development of new food products, and analysis of pesticide residues and other toxic and non-toxic impurities.

Government Testing Laboratory

ALBERTA AGRICULTURE
Soil and Feed Testing Laboratory
9th Floor, O.S. Longman Building, 6909 - 116 Street
Box 8070
Edmonton, Alberta
T6H 4P2

436-9150
Mr. D.H. Laverty, P. Ag.

This laboratory does not accept commercial samples. The testing services include fertility analysis of farm, garden and greenhouse soil. Quality analysis of farm grown grains and roughages. The laboratory is also involved in the development of improved techniqes for diagnosis and utilization of farm soil and feeds. Fees are charged for these services. Recommendations based on analysis are provided upon request.

Government Testing Laboratory

ALBERTA AGRICULTURE
Toxicolgy Provincial Analyst Laboratory
6th Floor, O. S. Longman Building
6909 - 116 Street
Edmonton, Alberta
T6H 4P2

436-8410
Mrs. K.I. Strausz, Director.

This laboratory is part of the Alberta Agriculture, Animal Health Division, Reference Laboratories. It provides services in analytical chemistry and chemical toxicology relating to human and veterinary toxicology, environmental health control, forensic chemistry and chemical quality control for Government Agencies, Hospitals, physicians and Police Forces. Acceptance from private individuals is limited. Some tests are done on a commercial basis, but those involving public health, such as water analysis and analysis of poisonous materials are done free of charge if submitted through Health Units, Police Forces, Government Agencies or Physcians.

Special Equipment:

1. GC/MS/DS/ Spectrometer.
2. Gas Chromatographs.
3. P.E. 621 IR Spectrophotometer.
4. U.V. Spectrophotometers.
5. P.E. M.P.F. 4 Flourescene Spectrometer with TLC accessories.
6. A.A. Spectrophotometers (2 P.E. 5000).
7. Graphite Furnace.
8. Data System.
9. Mercury vapour detector.
10. IL CO-oximeter.
11. Chemetric clinical autoanalyzer.
12. HPLC.

Government Testing Laboratory

ALBERTA ENERGY AND NATURAL RESOURCES
Fish and Wildlife Laboratory
O. S. Longman Building
6909 - 116 Street
Edmonton, Alberta
T6H 4P2

436-8240
Dr. B.F. Bidgood, Head Fisheries Research.
Mr. B. Wishart, Head Wildlife Research.

The wildlife research section examines the factors that affect the production, survival and growth of wildlife species in the province. Research studies include the influence of behaviour, nutrition, weather, habitat, predation, disease, parasites, and pesticides on wildlife populations.

The fisheries research section works in two major fields. Basic biological research on fish species and water pollution research relevant to the survival and welfare of fish populations. Water analysis, pesticides tests, etc. are referred to other branches of this building.

Government Testing Laboratory

ALBERTA ENERGY RESOURCES CONSERVATION BOARD
Core Research Centre
3507 - 33 Street N.W.
Calgary, Alberta
T2L 2A7

289-6636
Mr. A.H. Shepard, Administrator.

A sample washing machine washes and dries the sample cutting required by the Alberta Energy Resources Conservation Board for wells associated with oil and gas exploration or development. The cuttings are stored in glass vials and are available for examination but cannot be removed from the premises.

Essentially all core recovered from wells drilled in the Province is stored and made available for examination at the Centre.

Special Equipment: A sample washing machine, capable of washing 24,000 sets of sample cuttings per month, is located in the centre. The machine is confined to Board use. A core slabbing saw, capable of slabbing 900 linear metres of core per month and an automatic feed core drill capable of cutting various diameter core plugs for laboratory tests are also located at the centre. This equipment is operated on a cost basis for the Petroleum Industry.

Government Testing Laboratory

ALBERTA ENVIRONMENT
Design and Construction Division
Materials Testing Laboratory
4th Floor, O.S. Longman Building
6909 - 116 Street
Edmonton, Alberta
T6H 4P2

436-8840
Mr. D. Brittain, Head.

Commercial tests are not accepted in this lab. This is where overburden soil and bedrock samples are tested to evaluate foundation conditions and fill requirements for stability, compressibility and suitability as foudation and construction materials for water control structures.

Government Testing Laboratory

ALBERTA ENVIRONMENT
Pollution Control Division
Air Quality Control Branch
6th Floor, Oxbridge Place
9820 - 106 St.
Edmonton, Alberta
T5K 2J6

427-5893
Mr. J.C. Lack, Head.

Enforcement of regulations under The Clean Air Act and the terms of air quality approvals, licences and permits, and the general monitoring of the air environment is the major function of the Air Quality Control Branch. This requires maintenance of an extensive air quality monitoring network and a program to sample effluents from stationary sources. Industry is required to monitor its operations and the branch verifies these results.

Government Testing Laboratory

ALBERTA ENVIRONMENT
Pollution Control Division
Pesticides Branch
Oxbridge Place
9820 - 106 St.
Edmonton, Alberta
T5K 2J6

427-5847
Dr. B.W. Taylor

Limited facilities for evaluation of efficacy and toxicity of current and new insecticides that may be used in the biting fly control program in Alberta.

Government Testing Laboratory

ALBERTA ENVIRONMENT
Pollution Control Division
Water Quality Control Branch
6th Floor, Oxbridge Place
9820 - 106 St.
Edmonton, Alberta
T5K 2J6

427-5828
Mr. A. Masuda, P. Eng., Head.

Does monitoring and enforcement of water pollution in Alberta, but do not have a testing laboratory.

Government Testing Laboratory

ALBERTA ENVIRONMENT
Earth Sciences Division
Technical Development Branch
Box 3014, Cousins Building
Lethbridge, Alberta
T1J 4B3

329-5322
Mr. D.N. Graveland, Branch Head.

The main purpose of this inorganic laboratory is as a service for the Alberta Environmental Earth Sciences and Licencing Division and applied research in related fields. No commercial testing is available as a routine. Testing done in the laboratory includes soil chemical analysis and water analysis. Facilities are available also for soil-moisture analysis.

Government Testing Laboratory

ALBERTA ENVIRONMENTAL CENTRE
Animal Sciences Wing
P.O. Box 4000
Vegreville, Alberta
T0B 4L0

632-6767
Dr. Len Lillie, Head.

Major advisory and diagnostic services cover plant diseases, crop and livestock insect pests, weed control, plant identification and suspected chemical damage to crops.

Expanded research activities include investigations of the biology and impact of Bertha armyworms, biological control of greenhouse insect pests, control of insect pests of cattle, and crop tolerance to herbicides.

Government Testing Laboratory

ALBERTA ENVIRONMENTAL CENTRE
Chemistry Wing
P.O. Bag 4000
Vegreville, Alberta
T0B 4L0

632-6767
Dr. John Hardy, Head.

The Chemistry Wing analyzes Alberta drinking water submitted through provincial health units. It also assists other government department programs by analyzing air, industrial stack emissions, water, waste water, and sediment samples. Service is provided to other wings in the areas of chemical analyses, research projects involving chemical investigations, electron microscopy and the identification of micro-organisms.

Chemical and microbiological projects are planned to investigate pesticide residues in river and lake sediments, organohalgens in drinking water, the potential for microbial utilization of wood pulp, and the degradation of oil spills.

Investigations of aspects of the complex and increasingly controversial subject of acid rain is one of the functions within this department.

Government Testing Laboratory

ALBERTA ENVIRONMENTAL CENTRE
Plant Sciences Wing
P.O. Bag 4000
Vegreville, Alberta
T0B 4L0

632-6767
Dr. Bart Bolwyn, Head.

There are two components to the Plant Sciences Wing - the Pest Management Group and the Reclamation Group.

A diagnostic and advisory service is provided by the Pest Management Group, which conducts problem solving research on those plant diseases, insects and weeds which are pests in agricultural production, homes, gardens, greenhouses, and recreational areas. Service to agriculture is provided through regional crops laboratories, district agriculturists and agricultural fieldmen. The group helps urban populations by giving backup service to horticultural staff who handle calls from homeowners in several Alberta cities. This kind of assistance is also available to personnel in charge of provincial parks and other recreational areas.

The Reclamation Group is concerned with research in reclamation and revegetation of disturbed sites anywhere in Alberta. Disturbance in balanced ecosystems are the result of open-pit mining, construction of highways, power lines and pipe lines, and nearby park use. Work at the AEC concentrates on species selection, seed production methods, propagation and planting techniques. Test material consists mainly of native species of grasses, legumes and shrubs. This work is supported with research on soil physics and soil fertility pertaining mainly to non-agricultural areas.

Government Testing Laboratory

ALBERTA LABOUR
Gas Protection Branch
800, 10808 - 99 Avenue
Edmonton, Alberta
T5K 0G5

427-8256
Mr. J. Mercer, Director.

Under the Alberta Regulation 179/68 of the Gas Protection Act, all natural and liquefied petroleum gas appliances installed in the Province of Alberta are required to bear the seal of approval of a recognized testing agency. Where it is considered impractical or unfeasible to apply for certification from one of the recognized laboratories, an application for approval can be made to the Gas Protection Branch. Certification is obtained upon the satisfactory completion in accordance with the applicable CSA B200 Series Standards or other related acceptable specifications.

Gas appliances and equipment of inputs greater than 400,000 BTU per hour require a special field test before the installation can be accepted as approved. An operational test will be performed to ensure that the operation meets the safety requirements for the location, altitude, and calorific values of the gas being used. For assemblies designed for a special application which do not carry the approval of a recognized testing agency, a more detailed test will be made of the component parts, as well as the complete operational test on the assembly. Special field tests are supplemental for the installation of the gas piping, venting, etc., as required by the gas installation code.

Government Testing Laboratory

ALBERTA PROVINCIAL LABORATORY OF PUBLIC HEALTH
3030 - Hospital Drive N.W.
Calgary, Alberta
T2N 4N1

270-1200
Dr. C.M. Anand, Director.
Dr. S. Gubash, Microbiologist.

Water examinations (bacteriological only) are carried out for members of the medical, dental and veterinary professions, hospitals, health units and authorized health authorities. Members of the general public wishing such examinations should contact their local health authority.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Alberta Soil Survey Laboratory
6th Floor, Terrace Plaza
4445 - Calgary Trail South
Edmonton, Alberta
T6H 5R7

438-1555
Dr. Larry Turchenek

The Alberta Soil Survey Laboratory is operated jointly by the Soils Department (Alberta Research Council), and by the Pedology Unit (Agriculture Canada), for the purpose of routine soil analyses in support of various survey and soil research projects.

Chemical determinations include carbon, nitrogen, exchangeable cations, pH, soluble salt and extractable iron and aluminum analyses.

Physical analyses include particle size distribution, Atterburg limits, and moisture retention.

Although the laboratory mainly supports soils projects, some instruments and services are available to other ARC departments.

Special equipment: Leco CR-12 Carbon Analyser, Neutron Moisture Meters, Gamma Ray Probe, and Air Entry Permeameter.

Some special chemical analyses on soil include: total C, total N, total major and minor elements (with chemistry lab), pH, electrical conductivity (saturated soil extract), soluble salt analysis, cation exchange capacity, exchangeable cations, extractable Al, Fe, Mn, and Si, loss on ignition, organic matter content, pyrophosphate soluble organic matter.

Some special physical analyses on soil includes: particle size, fiber content, moisture retention.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Chemical and Materials Engineering
Chemical Testing Laboratory
Parson's Warehouse
4920 - 91A Street
Edmonton, Alberta
T6E 5V2

439-5916
Mrs. G. Stott

The major function of this laboratory is problem solving for industrial clients including identification of materials such as plastics, solvents, corrosion and scaling products and various contaminants.

The laboratory also performs a variety of other tests on materials such as peat moss, ceramic food wares, paints, cleaning agents, and building materials. The lab may also conduct routine surveys for industrial clients if commercial facilities are unavailable.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Chemistry Analytical Laboratory
11315 - 87 Avenue
Edmonton, Alberta
T6G 2C2

439-5916
Dr. Michael Gray

The Chemistry Analytical Laboratory provides analytical support in the areas of inorganic analysis and spectroscopy for all ARC departments. The laboratory will provide these services to external clients if the services are not available commercially or for special applications. Services available on a routine basis include:

1. General inorganic analysis - atomic absorption analysis for major and trace species, ion chromatography, inductively coupled argon plasma emission, water analysis for major and trace inorganic species.
2. Spectroscopy - UV/visible, infrared, fourier transform nuclear magnetic resonance, electron spin resonance, X-ray fluorescene, and gas positive and negative ions with both electron impact and chemical ionization.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Coal Analytical Laboratory
11315 - 87 Avenue
Edmonton, Alberta
T6G 2C2

439-5916
Dr. Milan Selucky

The objective of this laboratory is to provide routine and non-routine analyses of coal and coal-derived products. Routine analyses include: carbon, hydrogen, nitrogen and sulfur analyses, determination of calorific values, and proximate analysis of coals.

The laboratory is expanding and other analytical methods, both chemical and physical will be added. At the present time, the laboratory is essentially dedicated to Coal Department projects, but some work is done for other ARC departments. External organizations are encouraged to use existing commercial facilities except in special circumstances.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Gasoline and Oil Testing Laboratory
11315 - 87 Avenue
Edmonton, Alberta
T6G 2C2

439-5916
Mrs. Gladys Stott
Mr. Ron Wasel

The Gasoline and Oil Laboratory provides a wide range of testing and inspection services on petroleum and related products for government departments and other departments of ARC. The services available to private clients when commercial facilities are unavailable or special circumstances exist. The laboratory co-ordinates three major quality control programs in Canada and publishes a biennial survey of the quality of motor gasolines sold in Alberta.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Geological Survey
3rd Floor, Terrace Plaza
4445 - Calgary Trail South
Edmonton, Alberta
T6H 5R7

438-0555
Brian Rottenfusser, Supervisor.

Sedimentation Laboratory

The sedimentation laboratory services include: preparation of thin sections of rock and sediment samples including oil sands and materials containing water sensitive clays, size analysis of sand, silt and clay, separation and mounting of heavy minerals for loose grain examination, and extraction of oil from oil sands and bitumen concentrations. The laboratory also performs services such as crushing, rock sawing, and slab polishing. The laboratory prepares samples for scanning electron microscopy and X-ray diffraction analysis.

Ceramics Laboratory

The ceramics laboratory performs: pytometric core equivalent on clays, determination of fired shrinkage and firing range on extruded or hand-molded bars, cold water absorption, and firing of samples to check aggregate potential.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Industrial Development Department
4th Floor, Terrace Plaza
4445 - Calgary Trail South
Edmonton, Alberta
T6H 5R7

438-0666
John Holub, Head

The Industrial Development Department assists clients with technical and engineering problems and provides a variety of physical evaluations of materials and products. Services include physical tests of materials, mechanical engineering and electrical measurements.

Physical Tests of Materials

This section includes tensile tests, compression tests, impact tests, failure analysis, hardness tests, hardenability assessment, accelerated weathering, color determinations, gloss measurements and ultrasonic inspections. Some special testing equipment: scanning electron microscopy, laboratory scale heat treatment, weatherometer, Satec Universal testing machine (500 KN).

Mechanical Engineering

Testing includes air infiltration (windows, doors), air flow measurement, noise analysis, acoustical evaluations, vibration analysis, dynamic and static stress analysis and temperature measurement.

Electrical Measurements

This section is capable of carrying out the following measurements - high current, high voltage, high power, electromagnetic fields, power factor, frequency and static electricity.

Government Testing Laboratory

ALBERTA RESEARCH COUNCIL
Oil Sands Analytical Laboratory
Clover Bar, Highway 2 East
Edmonton, Alberta
T6G 2C2

464-9212
Dr. Charles Reichert

The Oil Sands Analytical Laboratory provides general analytical support for the Oil Sands Research Department projects and specialized services to other ARC departments. The laboratory also provides an advisory service to industry and commercial laboratories, and will conduct special analyses not available from commercial laboratories. The laboratory provides routine analytical services in the following areas:

1. Analysis of bitumen, water and solids in oil sands, production fluids, and related samples using the Modified Dean Stark extraction procedure.
2. Preparation of pure bitumen and components.
3. Spectroscopic analyses including UV-visible, X-ray fluorescence and diffraction, and infrared.
4. General physical and chemical analyses including density, viscosity, molecular weight, particle size distribution, anion and cation analysis of aqueous samples, gas and liquid chromatography, pH and conductivity.

Additional analytical tests:

1. Bitumen tests - acidity, ash, ash analysis, carbon and hydrogen, nitrogen, sulfur, saturates, aromatics, resins, asphaltenes, gravity as a function of temperature and pressure, viscosity as a function of temperature and pressure, molecular weight, spinning band distillation, simulated distillation by gas chromatography, determination of naphtha, solvent and other additives, vanadium, nickel and iron content.
2. Hydrocarbon distillates - acidity determination, bromine number determination.
3. Oil emulsions - percent by weight oil and water and solids (Dean Stark).
4. Water emulsions - percent by weight oil and water and solids (Dean Stark), particle size distribution of oil droplets (coulter counter).
5. Oil sand process streams - percent by weight oil and water and solids.
6. Core - bituminous sands - fines analysis - particle size distribution by coulter counter, and by X-ray sedigraph.
7. Oil well water tests - particle size distributions of suspended solids.

Government Testing Laboratory

ALBERTA TRANSPORTATION
Materials Engineering Branch
6312 - 50 Street
P. O. Box 5867, Station L
Edmonton, Alberta
T6C 4G3

427-8053
Mr. D. Palsat, Assistant Director-Testing Services.
Sue Khalil, Laboratory Engineer.

No commercial tests are performed. However, physical and some chemical tests are carried out on all construction materials used in highways including soils, paints, aggregates, asphalt and asphalt mixtures, cement, concrete and soil-cement. The laboratory is equipped with testing machines, frost room, triaxial apparatus, weatherometer, consolidation apparatus plus other extensive equipment for complete testing of most materials used in highway work.

The laboratory includes calibration blocks for the purpose of calibrating nuclear moisture density gauges and asphalt gauges.

Government Testing Laboratory

ALBERTA WORKERS' HEALTH, SAFETY AND COMPENSATION
Occupational Health and Safety Division
4th Floor, Donsdale Place
10709 - Jasper Avenue
Edmonton, Alberta
T5J 3N3

427-6971
Mr. P. VanRoosmalen, Laboratory Services Branch, 427-8067.

This division is concerned with the analysis of environmental and biological samples originating from the workplace environment or samples collected from workers suspected to have been exposed to hazardous materials. Services provided include sampling and analysis of atmospheric contaminants, analysis of biological specimens for ingested contaminants or their resultant metoabolites. Instrumentation is also available for monitoring exposure to various forms of radiation.

Laboratory instrumentation include: gas detector tube systems, combustible gas meters, carbon monoxide analysis, gravimetric dust samples, high pressure liquid chromatography, gas chromatography, infrared spectrograph, atomic absorption spectrophometer, liquid scintillation spectrometer, and gamma spectrometer.

Private Testing Laboratory

ALCAN SMELTERS AND CHEMICALS LTD.
Box 5850, Station L
Edmonton, Alberta
T6C 4G3

467-9422
D.H. Bowerman, Plant Manager.
G.R. Norman, Project Technician.

Testing performed is primarily for own use. Testing of petroleum coke for residual volatiles, sulphur and metallics. Similar tests are made of calcined products.

Private Testing Laboratory

ALCHEM INC.
1710 - 110 Avenue, Box 6120, Station C
Edmonton, Alberta
T5B 4K5

468-5256
Mr. R. Gibson, Laboratory Supervisor.

The main function of the laboratory is performing tests on the usage of the company's commercial products, such as boiler water and cooling tower chemicals and corrosion inhibitors. Have facilities for general water analysis, microbiological and some assay analysis. Some microscopic examination performed. Tests that cannot be done here on the above materials are forwarded to Burlington, Ontario.

Commercial Testing Laboratory

ALFOR METALLURGICAL COMPANY LTD.
9739 - 63 Avenue
Edmonton, Alberta
T6E 0G7

437-0048
Mr. C.E. Mozeson, P. Eng., President.

This is a company of consulting, metallurgical and testing engineers that offers the following services:

1. Analysis of metallurgical failures
2. Metallographic examination of metals and alloys
3. Corrosion engineering
4. Welding engineering
5. Plastics engineering
6. Mechanical testing:
    (a) Hardness testing
    (b) Tensile testing
    (c) Guided bend testing
    (d) Impact testing
7. Radiographic examination
8. Ultrasonic testing
9. Magnetic particle inspection
10. Dye penetrant inspection

Commercial Testing Laboratory

ALMOR TESTING SERVICES LTD.
7058 D - Farrell Road S.E.
Calgary, Alberta
T2H 0T2

253-4472
Al Morozoff, President.

Almor Testing Services Ltd. was established in 1974 to provide testing and consulting services in the soils, concrete and asphalt fields. Professional and support staff offer diverse academic backgrounds and extensive practical experience, enabling the company to handle a wide variety of material investigations and quality control assignments.

Commercial Testing Laboratory

AMF TUBOSCOPE INC.
Box 5513, Station A
7024 Farrel Road S.E.
Calgary, Alberta
T2H 1X9

252-4421
Mr. F. Lewis, Sales Manager.

This facility is orientated to non-destructive testing of tubular oil field goods by electromagnetic and gamma ray techniques.

Private Testing Laboratory

AMF TUBOSCOPE INC.
P.O. Box 4219, South Edmonton
Edmonton, Alberta
T6E 4T2

955-7666
Mr. A. Kuharchuk, Division Manager.

Non-destructive testing of oil field tubular goods. Do continuous wall measuring - particle, cobalt, gamma ray resonance.

Commercial Testing Laboratory

ANDERSON, WISKEL AND ASSOCIATES LTD.
2, 9812 - 47 Avenue
Edmonton, Alberta
T6E 5E3

434-8792
Mr. C.J. Anderson, P. Eng., President.

Mechanical Facilities:

1. Strain Gauge
2. Other experimental stress analysis
3. Design and building transducers for pressure, load, temperature or displacement monitoring
4. Oil tool and equipment design

Metallurgical Facilities:

1. Fracture analysis
2. Metallurgical sample preparation
3. Metallurgical analysis and corrosion studies are performed
4. Other special capabilities include industrial and motor vehicle accident investigations

Commercial Testing Laboratory

ARVIDSON ENGINEERING ASSOCIATES
104, 6036 - 3 Street S.W.
Calgary, Alberta
T2H 0H9

255-1142
Wayne D. Arvidson, M.Sc., P.Eng..

A.E.A. provides a wide range of civil engineering services specializing in geotechnical and geological aspects of projects including foundations and earth structures, commercial and industrial facilities, mining, transportation and offshore works.

Commercial Testing Laboratory

B.C. RESEARCH
3650 Wesbrook Mall
Vancouver, B.C.
V6S 2L2

224-4331
Dr. V.A. Mode, Director.

This centre is mainly concerned with contract work for commercial firms and government departments in Canada and internationally. Activities include process, product, equipment and instrument development. Research and technical services are offered in the fields of industrial chemistry, electrochemistry, coal liquification, fluid bed technology, bulk materials handling, extractive metallurgy, industrial health, bio-engineering, fisheries technology, environmental resource management, mechanical engineeing, applied energy systems, electronics systems, appliance testing, engineering services, ship model testing, economics, market research, operations research, productivity and technical information. Pilot-plant facilities are available.

Special Equipment

1. Wide range of analytical facilities, including visible, ultraviolet and infrared spectrophotometers, flame and flameless atomic absorption spectrophotometers, gas chromatographs, high performance liquid chromatographs, photofluorometer, pH and conductivity meters, organic carbon analyzer, muffle furnaces, drying ovens, volumetric and gravimetric facilities, adiabatic bomb calorimeter, Leco furnace, and hydrogenation facility.
2. Complete microbiological facilities, including sterile transfer room, sterilizers, Warburg respirometer, continuous fermentres, automatic agar dispenser and automatic colony (particle) and surface area counter.
3. Wide range of microscope facilities, including zoom stereomicroscopes, high resolution microscopes, photomicroscopes and aerial photographic scannerscopes.
4. Complete range of centrifuge facilities, including continuous flow, high-speed refrigerated centrifuges and an ultra centrifuge.
5. Two programmable growth chambers.
6. Two temperature, humidity controlled walk-in growth chambers.
7. Controlled temperature room incubators.
8. Two walk-in refrigerators and a walk-in deep freeze.
9. Facilities for histological examinations.
10. High performance liquid chromatograph, thin layer chromatographic facilities.
11. A complete line of column chromatograph facilities and a range of gas-liquid chromatographs, equipped with temperature programmers, integrators, capillary and conventional columns and a variety of detectors and a pyrolysis attachment.
12. Access to mass and NMR spectrometry facilities.
13. Miscellaneous organic chemical facilities, including rotary evaporators, extractors, polarimeter and melting point apparatus.
14. A complete range of experimental facilities for evaluation of primary, secondary and tertiary effluent treatment, a pilot-sized ozone generator, and including batch and continuous bench-sized fermenters, extending up to pilot-scale size in some instances.
15. A radiochemical laboratory, equipped for autoradiography and with automatic planchet and liquid scintillation counting equipment.
16. Complete facilities for microbiological mineral leaching investigations, ore grinding facilities, gyratory shakers fermentors, controlled temperature leaching column room and pilot-scale leaching columns.
17. Ore dressing facilities.
18. Temperature controlled sample storage facility.
19. A complete fish holding facility.
20. Eight temperature controlled rooms for biological investigations, three equipped for static and flow-through bioassays.
21. Extensive limnological equipment for stream and lake surveys, including sampling equipment, portable DO meters, automatic current meter and salinometer -conductor probe, etc., with five sensors.
22. Three portable trailer laboratories, housing bioassay and pilot-plant facilities.
23. A comprehensive range of laboratory and pilot scale fishing processing, mincing and deboning facilities with associated controlled temperature storage systems.
24. Air pollution measurement equipment, including high volume air samplers, dust collectors, tape samplers, smoke stack particulate and gas sampling equipment, hydrocarbon analyzer, mechanical and automatic weather stations.
25. Pulp and paper laboratory equipment, including pulping autoclave, sheet making equipment, PFI-mill, CSF tester, Elrepho brightness and opacity tester, strength testing equipment, chip screen, pulp screen, lime kiln, bleaching equipment, constant humidity facilities.
26. Fritsch sieve shaker.
27. Berglund-Liu Mono disperse aerosol generator.
28. Ten inch and thirty inch ring shear cells suitable for ambient and freezing temperatures.
29. Twenty-four inch wall friction tester.

30. Jenike flow factor tester.
31. Supercritical gas extraction apparatus.
32. 2 foot diameter fluidized bed reactor suitable for either gasification or combustion studies.
33. One foot diameter fluid coker.
34. Continuous fixed bed catalytic hydrotreater.
35. Continuous coal liquefaction pilot plant.
36. Compressed natural gas compressor station.
37. Optical Metrology: Alignment telescopes, autocollimators, jig transit, angle gauge blocks.
38. Electrical Metrology: Low frequency and direct current precision measurement and calibration facilities.
39. Noise Pollution: Sound level meters, calibrator, octave band and narrow-band analyzers.
40. Vibration and Strain: Piezo, magnetic, and resistance gauge pickups, meters, analyzers.
41. Colorimetry: Reflectance spectrophotometer, gloss meters.
42. Monitoring Instrumentation: Storage-mode cathode ray oscilloscopes, optical galvanometer, digital magnetic tape recorders, precision time-interval and frequency metering.
43. Ocean Engineering Facility: Ship and marine structure modelling, towing and manouvering tests in still water and waves, consulting on performance improvement.
44. Equipment and Materials Testing: Strength, fatigue, environmental testing, hydraulic test bench.

Private Testing Laboratory

B.J. WELL SERVICES LTD.
Division of B. J. Hughes
9504 - 62 Avenue
Edmonton, Alberta
T6E 0C9

434-9574
Mr. G. Briggs, Laboratory Manager.

This company does, for its own quality control, routine water analysis, various core tests, basic crude oil testing (API, emulsion tests) and complete API procedures for testing oil well cement and various admixes. The laboratory also does complete calibration of Downhole Study Temperature and Pressure (DST) Recorders.

Equipment and facilities include - Pan American Cosistometer (a high pressure, high temperature thickening time tester), high pressure, high temperature compressive strength curing chamber, ultra high temperature / pressure curing chamber, complete core analyses for various oil well treatments.

Commercial Testing Laboratory

B.W. BROOKER ENGINEERING LTD.
11738 - Kingsway Avenue
Edmonton, Alberta
T5G 0X5

453-3675
Mr. B. W. Brooker, P. Eng. President.

Provides civil, municipal, and structural engineering consulting services. No laboratory testing facilities.

Commercial Testing Laboratory

BALL WELDING AND METALLURGICAL ENGINEERING LTD.
17510 - 102 Avenue
Edmonton, Alberta
T5S 1K2

483-0206
Dr. B.E. Ball, Ph.D., P. Eng.

Company services include: welding and metallurgical consulting, failure analysis and accident/fire investigation, metallurgical laboratory services, equipment inspection, refractory materials consulting and testing.

Commercial Testing Laboratory

BARBER INDUSTRIES
P.O. Box 5280, Station A
9625 - Shepard Road S.E.
Calgary, Alberta
T2H 2P3

279-7511
Mr. John D. Thomson, Vice-President of Operations.

This firm is equipped to do metal hardness testing and inspection for flaws by Dye Penetrant, magentic particle and ultrasonic, also thread and form measurements with optical comparator, taper, lead and depth indicators.

Special Equipment: A testing structure for lead and deflection testing of poles or any similar cantilever structure to a total applied moment of 40 million inch pounds.

Commercial Testing Laboratory

BARRINGER MAGENTA LTD.
105, 3750 - 19th Street N.E.
Calgary, Alberta
T2E 6V2

276-9701
Mr. D. Read, Manager.

Services include test on air pollution, chemical analysis, water anallysis, coal tests, and soil analysis.

Commercial Testing Laboratory

BBT GEOTECHNICAL CONSULTANTS LTD.
6423A Burbank Road S.E.
Calgary, Alberta
T2H 2E1

252-1106
Leslie J. Korchinski, P.Eng., Manager.
Mr. C. Arnold, C.E.T., Laboratory Manager.

This laboratory, which was established in 1970, occupies over 5,000 square feet of space in a modern, air-conditioned building on the south-east side of Calgary. The laboratory is equipped with up-to-date equipment to perform physical and analytical tests on all construction materials: concrete, asphalt, soils, aggregates, fly ash, soil-cement, lime treated soils. Field tests are also conducted on all construction materials. Geotechnical investigations are performed for all types of structures, land development projects and civil works.

Commercial Testing Laboratory

BBT GEOTECHNICAL CONSULTANTS LTD.
3051 - Parsons Road
Edmonton, Alberta
T6N 1C8

463-9308
Mr. C.R. MacFadyen, P. Eng., President.
Mr. B.D. Constant, P. Eng., Manager.
Mr. L.S. Baskin, Director of Technical Services.

This laboratory, which was established in 1973, occupies over 12,000 square feet of space in a modern, air-conditioned building on the south side of Edmonton. The laboratory is equipped with up-to-date equipment to perform physical and analytical tests on all construction materials: concrete, asphalt, soils, aggregates, fly ash, soil-cement, lime treated soils. Field tests are also conducted on all construction materials. Geotechnical investigations are performed for all types of structures, land development projects and civil works.

Government Testing Laboratory

BBT GEOTECHNICAL CONSULTANTS LTD.
5406 - 52 Avenue
P.O. Box 1518
Lloydminster, Alberta
S9V 1K5

875-8975
Mr. Robert L. Kennett, P.Eng., Manager.

This laboratory, which was established in 1979, occupies over 2000 square feet of space in a modern, air-conditioned building on the north side of Lloydminster. The laboratory is equipped with up-to-date equipment to perform physical and analytical test on all construction materials: concrete, asphalt, soils, aggregates, soil-cement, lime treated soils. Field tests are also conducted on all construction materials. Geotechnical investigations are performed for all types of structures, land development projects and civil works.

Commercial Testing Laboratory

BETA MACHINERY ANALYSIS LTD.
6425 Bowness Road N.W.
Calgary, Alberta
T3B 0E6

288-4623
Mr. Dave N. Schuh, President.

The two services are machinery trouble-shooting and machinery diagnostics. Instrumentation is capable of measuring more dynamic machine phenomena. For example, force, acceleration, velocity, position, speed, pressure, temperature.

Commercial Testing Laboratory

BETZ LABORATORIES LTD
504, South 8500 - Macleod Trail South
Calgary, Alberta
T2H 2N1

253-2010
Mr. G. Collins, Manager.

This laboratory is completely mobile for on-the-spot analysis of domestic, boiler, cooling, by-product cooling and condensate water, detailed examinations are sent on to the main laboratory in Montreal. Process control and industrial waste treatment studies are undertaken by the laboratory. Microbiological investigations are undertaken, and studies of deterioration of wooden cooling towers. Completely equipped to run comprehensive steam purity studies, by use of the Betz method of Sodium determination. Petramine product determinations are done for monoethanolamine and diethanolamine systems. Also, manufacturing of Betz chemicals is available in Edmonton.

Commercial Testing Laboratory

BIRTLEY COAL AND MINERALS TESTING
Division of Great West Steel Industries Ltd.
505 - 50 Avenue S.E.
P.O. Box 5488, Postal Station A
Calgary, Alberta
T2H 1X9

253-8273
Mr. F.J. Horvat, General Manager.

This company offers a full range of services for the testing of coal - complex washability studies, pilot plant washing which incorporates heavy media, two stage water only cyclone and froth flotation circuits, and laboratory analyses including tests for moisture, ash, swelling (coking) characteristics, sulphur, calorific value, and volatile matter, Ruhr Dilatometer, Ash Fusion, Gieseler Plastometer, Ultimate Analysis, Hardgrove Grindability, Mineral analysis of ash and other inorganic determinations related to coal testing.

Special Equipment:

1. Complete pilot plant using dense medium cyclone, two stage water only cyclone system with DSM 6 inch and 4 inch cyclones, Birtley-Humboldt flotation cells and large scale vacuum filtration for beneficiation of coal.
2. Jaw Crusher
3. Wet drum high intensity magnetic separator.
4. Australian wet attrition drum.
5. Dry attrition drum (ASTM coke drum).

Private Testing Laboratory

C-I-L INC
4405 - 101 Avenue
Box 428
Edmonton, Alberta
T5J 2K1

466-1151
Mr. D.C. Eagles, Technical Superintendent.
Mr. K. Baden, Works Laboratory Supervisor.

Laboratory facilities for quality control on polyethylene.

Special Equipment:

1. UV spectrophotometer
2. Gas Chromatograph
3. Photoionization analyser
4. Tensile tester
5. Torque rheometer curing of resins
6. Plasticordes (process ability of polymers)
7. DuPont moisture analyser ppm of water in plastics
8. DuPont Thermal Analyzer (DSC)
9. Newport Broad Band NMR

Commercial Testing Laboratory

CALGON CANADA
Bradford Laboratories Division
Hall Laboratories Division
10436 - 81 Avenue
Edmonton, Alberta
T6A 3J6

432-7408
Mr. R. Dickinson, Chemist.

BRADFORD LABORATORIES DIVISION

Provides consulting, field and laboratory services on oilfield water flooding, steam flooding and salt water disposal projects.
Recommendations made for mechanical and chemical treatment to minimize plugging, scale, bacteria and corrosion problems.
Laboratory completely equipped to perform the necessary chemical and bacterial analyses on water samples, to identify deposits and carry out corrosion evaluations. Field sampling, testing, and inspection services provided by qualified engineering staff.

HALL LABORATORIES DIVISION

Detailed studies of source waters and provide construction information for water treatment facilities. Provides consulting, field and laboratory services to study and solve water problems related to industrial and municipal use. This includes the areas of boiler, cooling, process, waste and potable waters. Able to evaluate use of activated carbon with isotherms and plant carbon column studies.

Fully equipped to perform chemical and microbiological analyses of water samples in the above categories. In addition, coal washing polymer technology and evaluation of ion exchange resins is available.

Private Testing Laboratory

CANADA CEMENT LAFARGE LTD.
Box 3060
Sherwood Park, Alberta
T8A 2A6

467-5516
Mr. G. Reich, Lab Supervisor.

The laboratory in this grinding plant is oriented towards quality control of finished products. Testing is of wet chemical plus instrumentation variety. In these limited facilities no commercial testing is performed.

Commercial Testing Laboratory

CANADA WEST INSPECTION SERVICES LTD.
9739 - 63 Avenue
Edmonton, Alberta
T6E 0G7

435-3748
Mr. A. Met, General Manager.

Specialists in nondestructive testing for in-plant and field-welding projects, pipelines, pressure vessels, pressure piping, structural steel bridges, highrise buildings and storage tanks.

Inspection is made in accordance with specification codes CSA, ASME, ASTM, AWS and API. The staff includes twenty operators certified in accordance with the Canadian Government Specification Board at Levels 3, 2 and 1 in radiography, ultrasonics and magnetic particle inspection. On staff are inspectors certified by the Canadian Welding Bureau.

In more detail the work performed includes:

Ultrasonic flaw detection on weldments, castings, and steel stock
Ultrasonic measurement and corrosion surveys
X-ray radiography for pipelines and light alloys
Automatic internal X-ray crawlers for pipelines
Magnetic particle inspection, crack detection in weldments, steel products and engine components
Tank strapping on storage tanks
Visual inspection of piping, structural steel, pressure vessels
Auditing and consulting on non-destructive testing procedures and welding interpretation.

Private Testing Laboratory

CANCARB LTD.
P.O. Box 310
Medicine Hat, Alberta
T1A 7G1

527-1121
Mr. Tom Beach, Lab Supervisor.
Mr. D.G. Hurkot

Laboratory facilities are primarily for use by CanCarb Limited, used basically for quality control purposes, physical and rubber tests on thermal carbon.

Commercial Testing Laboratory

CAPROCO CORROSION PREVENTION LTD.
Internal Corrosion Service Division
5716 - 35 Street S.E.
Calgary, Alberta
T2T 2M2

279-2790
Mr. R.J. Maynard, P. Eng., Manager.

Engineering investigation, design, contract installation, material supply and field survey for: cathodic protection, protective coatings, corrosion probability analysis and monitoring.

Commercial Testing Laboratory

CAPROCO CORROSION PREVENTION LTD.
P.O. Box 5858, Station L
Edmonton, Alberta
T6C 4G3

468-2878
Mr. F.W. Hewes, P. Eng., Managing Director, President.
Mr. J.A. Jakobs, Ph.D., P. Eng., Research Engineer.

Engineering investigation, design, and field survey for:

1. Cathodic protection
2. Protective coatings
3. Corrosion probability analysis and monitoring
4. Contract installation and material supply for cathodic protection, protective coatings and corrosion monitoring.

Corrosion consulting and research:

1. Study of corrosion mechanism for cause, effect
2. Corrosion failure analysis and protective measures recommendation.

Private Testing Laboratory

CELANESE CANADA INC.
P.O. Box 99
Edmonton, Alberta
T5J 2H7

471-0511
Mr. J.J. Weber, Plant Chemist, Control and Development.
Mr. G. Halbert, Supervisor, Chemical Control Laboratory.
Mr. L. Durling, Supervisor, Fibres Control Laboratory.

CHEMICAL CONTROL LABORATORY

This laboratory is equipped to analyse the quality of the plant's products, intermediate process streams and do environmental testing and control.
The laboratory has computerized gas chromatographs, U.V. spectrophotometer, I.R. spectrophotometer and atomic absorption spectrophotometer equipment.

DEVELOPMENT LABORATORY

This laboratory does trouble shooting, product and process improvement.

FIBRES CONTROL LABORATORY

This laboratory does physical testing of fibres and cigarette tow.

Commercial Testing Laboratory

CENTRE FOR RESEARCH AND DEVELOPMENT IN MASONRY
105, 4528 - 6A Street N.E.
Calgary, Alberta
T2E 4B2

277-3024
E.L. Jessop, Director.

The Centre is an industrial research association devoted to the improvement of masonry products and structures built of masonry products.

The Centre offers technical services in masonry and provides masonry in Canada with its own research capability to support the development of appropriate codes and standards concerning masonry construction, particularly in the areas of energy conservation and limit states design.

The Centre has its own laboratory which houses such major equipment as a Forney 1,500,000 lb. compression machine, a Rhiele 60,000 lb. compression-tension machine, a 300 lb. per square foot lateral load frame and an ASTM E514 rain penetration apparatus and the minor equipment required to conduct basic CSA and ASTM masonry tests. The Centre also has access to the use of a programmable freeze-thaw chamber, data acquisition systems, computer services and reproduction and printing facilities.

Commercial Testing Laboratory

CHEMEX LABS (ALBERTA) LTD.
2021 - 41 Avenue N.E.
Calgary, Alberta
T2E 6T2

276-9627
Mr. John Stanley, President.
Mr. Jim Steppler, Field Services Manager.

This company has laboratory facilities and head office located in Calgary with offices in Vancouver and Edmonton. The company provides complete analytical and consulting services for: Environmental Projects, Water Quality Analyses, Effluent Analyses, petroleum and natural gas analyses, gas plant and oil field sampling services, trace sulphur analyses, soil analyses, hazardous chemical analyses, pesticide analyses, air monitoring, mineral analyses, and medical gas testing.

Commercial Testing Laboratory

CHEMEX LABS (ALBERTA) LTD.
8764-50 Avenue
Edmonton, Alberta
T6E 5K8

465-9877
Mr. Bernie Brassard, Manager.

CHEMEX is an independent Canadian company with the knowledge, experience, and facilities to perform analytical and consulting services to industry and government.

Incorporated in Alberta in 1972, Chemex has developed an analytical service with special expertise in Water, Gas, Oil, Air, Soil, Minerals, and Environmental monitoring.

Special Equipment:

1. Gow Mac 550 Dual TCD chromatograph
2. Varian 1700 Dual FID chromatograph
3. Varian 1700 Dual TCD chromatograph
4. Shimadzu GC Mini-2 Dual FID chromatograph
5. Spectraphysics 4100 computing integrator
6. Spectraphysics Minigrator digital integrator
7. Mettler balance
8. IL 151 Atomic absorption
9. Corning specific Ion and pH meters
10. Bausch and Lomb spectronic 20
11. Fisher refractometer
12. IEC PR-6 centrifuge

Commercial Testing Laboratory

CHEMEX LABS (ALBERTA) LTD.
105, 8502-112 Street
Grande Prairie, Alberta
T8V 5X4

532-0227
Mr. Herb Ellis, Manager.

This is a field sampling laboratory for oil, gas, water, and soil.

Special Equipment:

1. Bausch and Lomb spectronic 20
2. Fisher Flame photometer
3. IEC centrifuge
4. Oil hydrometer

Commercial Testing Laboratory

CHEMICAL AND GEOLOGICAL LABORATORIES LTD.
4605 - 12 Street N.E.
Calgary, Alberta
T2E 4R3

277-0725
Mr. W. Bugo, Manager.

Chemical analysis of oilfield brines and formation waters. Investigation of corrosion products, deposits in oilfield equipment and industrial plant scales. Crude oil analysis by A.S.T.M. and U.S.B.M. Methods. Evaluation of oil shale by modified Fischer Retort Method. Natural gas and liquid hydrocarbon analysis by chromatograph and fractional distillation. Reservoir fluid analysis (P.V.T.).

Microbiological determinations. In plant surveys by chromatographic analysis. Complete coal analysis and mineral assays.

Core analysis. Full diameter and small plug analysis of cores. Special core studies undertaken. Tar sand and heavy oil sands analysis.

Commercial Testing Laboratory

CHEMICAL AND GEOLOGICAL LABORATORIES LTD.
14203 - 129 Avenue
Edmonton, Alberta
T5L 4N9

454-1504
Mr. G.C. Utas, Manager.
Mr. S. Lucyk, Lab Manager.

This centre is completely equipped for routine and special analysis of cores, crude oil, natural gas, oilfield waters, corrosion products and deposits, coal and soil. Also, water quality analysis of surface waters, microbiological studies, and environmental studies are undertaken.

Conventional and special equipment available for analysis and services includes, gas chromatographs, flame photometric sulphur apparatus, equipment for P.V.T. studies of reservoir fluids, true boiling point, distillation apparatus, atomic absorption spectrometer, argon plasma atomic emission spectrometer and various automated systems.

Commercial Testing Laboratory

CHERITON ENGINEERING
700, Weber Center
5555 - Calgary Trail
Edmonton, Alberta
T6H 5P9

438-3811
Mr. J. Fenton, P. Eng..

Company is equipped to perform non-destructive acceptance and maintenance tests as follows:

D.C. Hypot precision measurement tests (maximum 300,000 volts) applicable to high voltage electric systems for establishing condition of dielectric and insulation.
Insulating liquid dielectric strength tests to ASTM standards.
Calibration, testing, and adjustment of protective relays associated with circuit breakers, motor controls, etc.
Current injection testing to determine contact resistance for bus work and circuit breakers.

Engineering problem solving service for mechanical and electrical systems where measurements or investigations are required. Company has equipment or access to equipment and services for this purpose.

Government Testing Laboratory

CITY OF EDMONTON
Engineering Department
Materials and Testing
2950 - Parsons Road
Edmonton, Alberta
T6N 1B1

428 5653
Mr. L. Dartnell, Director.

Commercial testing is not done here. This laboratory is composed of four distinct subsections

1. Quality Control - the testing of concrete, asphalt, soils and soil-cement.
2. Environmental and Analytical - do quality tests for noise, vibration, air and water as well as testing of metals, petroleum products, pavement marking, paint and textiles
3. Geotechnical Services - the testing of soil strengths, bank stabilities and trench backfill methods
4. Pavement Management Systems - comprised of regular pavement evaluation, research and developments, pavement performance and life cycle costing programs.

Private Testing Laboratory

CITY OF EDMONTON
Water and Sanitation
Rossdale Plant, 102 Street - 96 Avenue
Edmonton, Alberta
T5K 0A5

428-5111
Mr. L. Gyurek, Supervisor, Water Treatment Plants.

Commercial testing is not done here. Most of the work is connected with tests for treatment of city water supplies as required. However, the laboratory will do tests for towns, cities, and others as a spot check on their results.

Special Equipment: Photo-electric colorimeters - Fe, SiO2, organic color determination. Potentiometric titration for residual chlorine and residual fluorides. Odor determinations - threshold odor test. Stability indicator for softened water. Phenol in water determination. Oil in water determination. Jar tester - chemical dosage in water treatment. Autoclave, sterilizers, incubators, muffle furnaces. Zeromatic pH meter. Titrations for Ca, Mg, hardness, alkalinity. Complete gravimetric analysis. Total organic carbon test, Gas chromatograph and Atomic absorption capability.

Government Testing Laboratory

CITY OF LETHBRIDGE
Sewage Treatment Plant
910 - 4th Avenue South
Lethbridge, Alberta
T1J 0P6

320-3000
Mr. Steve Popson, Chief Operator.

Routine commercial tests are not carried out. Laboratory tests are performed on sewage waters for process control.

Government Testing Laboratory

CITY OF LETHBRIDGE
Water Treatment Plant
910 - 4th Avenue South
Lethbridge, Alberta
T1J 0P6

320-3000
Mr. L.E. Dye, Chemist.

Boiler water testing is carried out for the City power plant along with tests for other city owned boilers. Tests are done to determine treatment of the water supply. Will do tests for towns and cities as a spot check on their results.

Special Equipment: Titrator for residual chlorine, pH meters for alkalinity tests, turbidimeter to test turbidity of raw water, stirrer jar tester, bacteriological incubator, millipore filter apparatus, spectrophotometer, and fluoride determinations.

Government Testing Laboratory

CITY OF MEDICINE HAT
Waste Water Treatment Plant
180 Kipling Street
Medicine Hat, Alberta
T1A 1Y3

526-0254
Mr. Mike Babij

Most testing done is solely for internal use. Some tests on sewage water are carried out for own private information.

Private Testing Laboratory

CITY OF MEDICINE HAT
Water Treatment Plant
580 - 2nd Street S.E.
Medicine Hat, Alberta
T1A 0C7

526-2342
Mr. M. Babij, Superintendent.

Private testing lab primarily for the purpose of supporting the wastewater treatment plant, testing sewage and sludge samples, as well as domestic water supply.

Private Testing Laboratory

CITY OF RED DEER
Sewage Treatment Plant
City Hall
Red Deer, Alberta
T4N 3T3

342-8111
Mr. R. Bayne, Plant Superintendent.

Commercial testing is not done. Laboratory facilities are for the purpose of tests for treatment of the City water supply.

Private Testing Laboratory

CITY OF RED DEER
Water Treatment Plant
City Hall
Red Deer, Alberta
T4N 3T3

342-8111
Mr. R. Bayne, Plant Superintendent.

Commercial testing is not done. Laboratory facilities are for the purpose of tests for treatment of the City water supply.

Private Testing Laboratory

COMINCO LTD.
Calgary Fertilizer Operations
Box 5370, Station A
82 Avenue & 6 Street S.E.
Calgary, Alberta
T2H 2P4

255-8847
Mr. S.G. Bexton, Manager.

Laboratory facilities are strictly for use by Cominco Ltd. and are used basically for pollution monitoring and quality control purposes. The cooling water analyses performed include NH3-N, NO3-N, Organic-N, and suspended solids. Analyses are performed on boiler feed water and quality control of urea and ammonium nitrate solid product and solutions. Tests are also conducted on plant scrubbing solutions such as cuprous ammonium formate, potassium carbonate and monoethanolamine.

Private Testing Laboratory

CONSOLIDATED CONCRETE LTD.
Quality Control Department
7337 - Railway Street S.E.
P.O. Box 5338, Station A
Calgary, Alberta
T2H 2N8

255-1402
Mr. A. Stinner, Laboratory Supervisor.

No commercial testing for fee is done here. Mix designs for all types of Portland cement concrete are done. Facilities exist for sieve analysis of aggregates and curing and breaking of concrete masonry and pipe specimens. Routine testing of mortar cubes, flyash cubes and flyash fineness measurements are done. An electric oven is available for testing bloating characteristics of shales and clays (to 2500 F).

Commercial Testing Laboratory

CONSOLIDATED X-RAY LTD.
3705 - 29 Street, N.E.
P.O. Box 3066, Station B
Calgary, Alberta
T2M 4L6

285-2064
Mr. T. Quinlan, Executive Vice-President.

Non-destructive inspection of pipeline welding, pressure vessels and various types of metal fabrication.

Techniques include X-ray, gamma-ray, ultrasonics and magnetic particle. Gas plant corrosion surveys are also carried out.

Government Testing Laboratory

CONSUMER AND CORPORATE AFFAIRS CANADA
Electricity and Gas Inspection
2919 - 5 Avenue N.E.
Bag 60, Station J
Calgary, Alberta
T2A 4X4

231-5609
Mr. L.M. Hewitt, District Manager.

This department is concerned with the inspection of gas meters and the testing of electric meters. The primary standards necessary to establish the units of measure are deposited and maintained in the Standards Laboratory in the Department of Consumer and Corporate Affairs, Ottawa. The staff is also involved in inspecting and testing of all piping, fittings, and apparatus for the conveyance and measurement of gas. Every type of meter used in the sale of gas and electricity shall be approved and verified or re-verified as prescribed by the Standards Laboratory. Testing of an electric meter is determined on standard test boards, on which all routine tests can be accurately carried out. In situ tests are also carried out in the field to determine proper installation of meters. Fees are charged when the verification of the meters is completed.

Government Testing Laboratory

CONSUMER AND CORPORATE AFFAIRS CANADA
Weights and Measures
2919, 5 Avenue N.E.
Bag 60, Station J
Calgary, Alberta
T2A 4X4

231-5605
Mr. E.M. Cooper, District Manager.

This section of the department is concerned with inspecting and testing of scales, liquid meters, linear and volume measures used in wholesale or retail trade, for adherence to requirements of the Weights and Measures Act and Regulations regarding installation, accuracy, and use. Checks for short weight, including test purchases, are carried out on wholesale and retail commodities, in conjunction with device inspections. Charges are made for initial and request inspection of devices.

Departmental standards, calibrated to the National Canadian Standards, and traceable to international standards, are used for inspections and tests.

Commercial Testing Laboratory

CONTINENTAL LABORATORIES
3601-A, 21 Street N.E.
Calgary, Alberta
T2E 6T5

230-2171
Alex Finnie, Marketing Manager.

This is a service company oriented to on-site field situations in the drilling for oil and gas. They provide geological wellsite services including fluid and cuttings hydrocarbon well logging and geological wellsite supervision with a full range of wellsite gas detectors, chromatographs and mobile laboratories.

Private Testing Laboratory

CONTINENTAL PETROLEUM RUBBER COMPANY LTD
9725 - 62 Avenue
Edmonton, Alberta
T6E 0E5

437-1260
Mr. E.L. McIlvride, Factory Manager.

No commercial tests performed. Testing for self on finished industrial rubber products.

Commercial Testing Laboratory

CONTINENTAL PETROLEUM RUBBER COMPANY LTD.
511 - 12 Avenue
Nisku, Alberta
T0C 2G0

955-2802
Mr. Andrew Ciesielski, Rubber Chemist.

Continental Petroleum Rubber mainly does strength tests on rubber.

Commercial Testing Laboratory

CORE LABORATORIES CANADA LTD.
1540 - 25 Avenue, N.E.
Calgary, Alberta
T2E 7R2

230-9228
Mr. S. Slemko, President.

This laboratory is equipped to perform:

Routine and special core analysis, X-ray diffraction and scanning electron microscopy, heavy oil sands and oil shale analysis. Samples are accepted for steam and fireflood studies along with other special tests for secondary and tertiary recovery evaluation.

Analyses include routine formation brine, benzene-toluene determinations, potable, injection and waste water.

General chemical tests of unknowns.

Ambient air monitoring, bioassays, soil tests.

Hydrocarbon analyses include routine oils including true boiling point determinations, gases, hydrocarbon liquids to C30+, PVT studies of reservoir fluids, miscibility tests.

Special Equipment: chromatographs, podbielniaks, SO2 analyzers, atomic absorption, core-gamma, core photo, Particle size analyzer.

Commercial Testing Laboratory

CORE LABORATORIES CANADA LTD.
4777 - 93 Avenue
Edmonton, Alberta
T6B 2T6

468-2850
Mr. M. Mazurski, Area Manager.

This lab can perform routine core analysis, both full diameter and plug analysis. Tar, heavy oil analysis and tar sand evaluations are also performed.

Core photography under normal light and ultra violet is also possible. Petrographic services include S.E.M., X-ray diffraction, thin-sections, particle size analysis and cation exchange capacities.

Special core analysis including capillary pressure, electrical resistivity, liquid permeability, relative permeability wetability and water flood studies are performed.

Gas analysis, liquid hydrocarbon analysis, LPG's, trace sulphur analysis, low temperature distillations via podbielniak are performed in the gas lab.

The oil lab does routine analysis for formation, drinking or waste water analysis, compatabilities, environmental analysis, trout checks, exposure cylinders, ambient air monitoring and mud analysis.

The chemical lab handles sulphinol, amine, glycol and sludge and scale analysis.

The P.V.T. section handles reservoir fluid analysis, miscible floods, swelling tests, zero flash studies, pressure-volume relations, viscosities, and distillations of samples.

The engineering and consulting group perform all aspects of oil and gas engineering studies.

Our well logging operation has the most up to date computer technology for remote well logging.

All aspects of field sampling, plant performance testing, surface sampling and bottom hole sampling are also handled out of the lab.

Commercial Testing Laboratory

CORONET WELDING AND TEST CENTRE LTD.
7817 - Coronet Road
Edmonton, Alberta
T6E 4N7

466-9618
Ken Steery, General Manager.

C.S.A. Standard W-178 Certified Welding Inspection Company. Specialties include: materials testing laboratory welder qualification tests, welding procedures, trouble shooting, visual inspection, quality control, failure analysis, and chemical analysis.

Commercial Testing Laboratory

CULLIGAN WATER CONDITIONING (LETHBRIDGE) LTD.
120 D - North Mayor Magrath Drive
Lethbridge, Alberta
T1H 3P4

327-7867
Mr. A. Homes, Manager.

Mobile testing is available for routine water analysis. Testing for household, industrial, and commercial water applications - softening, purification and filtration. Complete analysis for water samples is available from Culligan International.

Commercial Testing Laboratory

CULLIGAN WATER CONDITIONING LTD.
3605 Manchester Road S.E.
Calgary, Alberta
T2G 3Z6

243-5141
D.R. Johnston, Manager.

As a service to its customers Culligan can carry out tests on the purity of water by means of measuring the resistance (ohms). Complete cation and/or anion analysis can be sent away to Culligan International in Chacago.

Commercial Testing Laboratory

CURTIS ENGINEERING AND TESTING LTD.
216 - 35 Avenue N.E.
Calgary, Alberta
T2E 2K4

276-8176
Mr. W.E. Curtis, Manager.

The laboratory is equipped to handle most routine tests on construction materials including soils, concrete, asphalt pavements, petroleum products and miscellaneous materials. The firm essentially deals with the physical tests on construction materials and carries out a minor amount of chemical testing. Roof inspection and consultation services are also provided.

Commercial Testing Laboratory

CURTIS ENGINEERING AND TESTING LTD.
9924 - 45 Avenue
Edmonton, Alberta
T6E 5J1

437 5820
Mr. G. Hunter, Manager.

The laboratory is equipped to handle most routine tests on construction materials including soils, concrete, asphalt pavements and miscellaneous materials. The firm essentially deals with the physical tests on construction materials and carries out a minor amount of chemical testing. Roof inspection services are also provided.

Commercial Testing Laboratory

CYCLONE ENGINEERING SALES LTD.
No. 2, 9751 - 51 Avenue
Edmonton, Alberta
T6E 4Z5

436-1385
Mr. R. Bow, Lab Manager.

This company has complete facilities in testing both the thermal and metallurgical coals. A separate processing laboratory is used for Bulk Sample analysis for plant design data.

The company also has pilot-scale facilities in specific gravity separation and size classification of solid, thickening of slurry and clarification of effluent. These facilities include classifying cyclones and compound water cyclones which the company is the Canadian Government Licensee of the patent.

Special Equipment:

Gieseler Plastometer
Audibert-Arnu Dilatometer
ASTM Tumbler Test for Coke D3402-75

Private Testing Laboratory

DOW CHEMICAL CANADA INC.
Western Canada Division
Box 759
Fort Saskatchewan, Alberta
T8L 2P4

988-5637
Dr. N. Darby, Central Research Laboratory Manager.

Dow perform no commercial testing. Dow have on site a number of quality control and environmental as well as research laboratories. Instrumentation consists of extensive gas chromatography equipment, liquid chromatography, gas chromatography-mass spectrometry, D.C. and I.C. argon plasma, atomic absorption, ultraviolet/visible and infra-red spectrophotometry, differential thermal analysis and accelerating rate calorimetry.

Private Testing Laboratory

DOWELL OF CANADA LTD.
Division of Dow Chemical Canada Inc.
3200, Bow Valley Square 4
250, 6 Avenue S.W.
Calgary, Alberta

267-3413
Mr. R. Marcinew, Regional Engineering Manager.

No commercial testing is done. Work done in the laboratory includes: water analysis, emulsion testing, viscosities, treating fluids, fluid-loss tests, core solubilities, scale analysis for industrial heating boilers, cement testing, oil analysis, core porosites and permeabilities, and sand testing.

Commercial Testing Laboratory

DRESSER CANADA INC.
Titan Division
4107 - 99 Street
Edmonton, Alberta
T6E 3N4

463-6711
Mr. L. Loewen, Product Manager.

The purpose of the laboratory is to serve the oil-producing companies for fracturing and acidizing. This includes core solubility, acid reaction rates, fluid compatibility tests, proppant tests, fluid loss tests, demulsifier test, antisludge test, gel compatibility tests and emulsion tests. Routine water analysis and product development are also carried out. In addition, work on clays in formation is performed.

Equipment: High pressure and high temperature acid reaction cells and fluid loss cells, hydraulic press viscometers, pH meter, microscopes, Atomic absorption, Hassler cells, core cutting, FANN 50 Viscometer.

Commercial Testing Laboratory

EBA ENGINEERING CONSULTANTS LTD.
7175 - 12th Street S.E.
Calgary, Alberta
T2H 1Z8

253-7121
Mr. N. Macleod, P. Eng., Manager, Materials Engineering Group.
Mr. J.B. Montgomery, P. Eng., Soils and Compaction Engineer.
Mr. H.G. Faer, Co-ordinator, Commerical Testing.

This laboratory is equipped to perform physical tests on soils and construction materials, asphalt cements, liquid and emulsified asphalts, wood, wood connectors, plastics and PVC conduit, physical tests on steel. The laboratory has capabilities to perform major testing programs to support engineering staff involved in geotechnical engineering.

This laboratory supports a large field testing staff which supplies monitoring services in soils compaction, asphalt and concrete mixing plant operations, in-place strength of maturing concrete, etc.

Special Equipment and Capabilities

1. Concrete laboratory certified by Canadian Standards Association (CSA A.283-Qualification Code for Concrete Testing Laboratories). The laboratory holds Type II (with all options) certification.
2. 400,000 lb capacity Tinius-Olsen Modified Super 'L' Universal testing machine complete with automatic stress-strain recorder, load pacer, and with extended column to accomodate overlength specimens.
3. Nuclear densometer equipment used to determine density and moisture content of soils, aggregates and soil cement, density of asphaltic concrete and Portland cement concrete.
4. Nuclear asphalt content gauges for rapid determination of asphalt content of paving mixes either in the field or laboratory.
5. Procedures for measuring in-place strength of structural concrete to facilitate early post-tensioning or removal.
6. A full line of soil testing apparatus to determine structural properties of soils for foundation and stability designs.
7. Field instrumentation-piezometers, slope indicators, etc.
8. Vibration monitoring equipment.
9. Seismic equipment to determine shear modulus and modulus of elasticity for soils.
10. Ultrasonic equipment for evaluation of properties of -place concrete
11. Microscopic linear traverse equipment for determining air spacing characteristics of air-entrained concrete
12. Equipment for accelerated curing of concrete specimens.
13. Equipment for testing of asphalt cements, emulsified asphalts and liquid asphalts - thin film oven, ductility apparatus, viscometry equipment (Kinematic, Absolute, Saybolt Furol), centrifuge and reflux extractors.
14. Marshall test apparatus including X-Y plotter for load deformation properties, mechanical compactors.
15. Aggregate testing equipment - jaw crusher, heavy duty sieve shakers, Los Angeles abrasion machine, etc.

This laboratory regularly consults to government agencies, the resource industry (oil, gas, tar sands, pipeline, etc.) prime consultants in commercial, municipal and industrial development, and contractors.

Commercial Testing Laboratory

EBA ENGINEERING CONSULTANTS LTD.
14535 - 118 Avenue
Edmonton, Alberta
T5L 2M7

451-2121
Dr. E.W. Brooker, P. Eng., President.
Mr. D.H. Seibt, Head of Materials Group.

EBA Engineering Consultants Ltd. was incorporated in 1966 to provide consulting services in the field of earth sciences engineering. The firm operates from modern office and laboratory facilities located in Edmonton and Calgary, and is wholly owned and managed by practising professionals.

EBA is a multi-disciplinary organization offering consulting services in the fields of geotechnical engineering, materials engineering, engineering geology, and groundwater hydrology. Experience gained on more than 6000 assignments finds application on new projects, large and small.

EBA strives to provide its clients with a high standard of technical expertise. A professional staff of more than 60 engineers and geologists offer diverse academic backgrounds and extensive practical experience. In addition, the firm employs over 100 technical support personnel who are trained in the use of some of the most advanced equipment available in Canada. Thus, a high level of quality is maintained in the field, laboratory, and graphic services provided by EBA.

The Materials Group specializes in the evaluation of construction materials and materials design. EBA's materials engineers offer their diversified experience to the construction and transportation industry with respect to mix designs for concrete, asphalt, and soil cement, pavement designs, evaluation of aggregates and pavements, and inspection services.

Complete testing services are provided to industry, consulting firms and EBA's various engineering groups. The laboratories are equipped with such instruments as Tinius-Olsen universal testing machines with a capacity of 1800 kN, extensive cold room facilities, a Hewlett-Packard computer-controlled data acquisition system, a Hewlett-Packard computer system for data reduction, processing and reporting, Troxler direct reading moisture-density meters, and nuclear asphalt content gauges. Field personnel are radio dispatched to give prompt service. The technical staff is trained in recognized testing procedures, and most technicians are certified by the Alberta Society of Engineering Technologists. Concrete testing procedures and facilities have been certified by the Canadian Standards Association in accordance with CSA Standard A.283 Qualification Code for Concrete Testing Laboritories - Type II Certification with all options.

EBA has also developed and constructed a variety of sophisticated electronic instrumentation and test apparatus in the instrumentation shop. Applied research has been carried out on such unusual materials as foamed plastics, with large assemblies such as trusses and railings, and using innovative techniques developed by EBA staff.

Commercial Testing Laboratory

EDMONTON ENGINEERING LTD
P.O. Box 8729, Station L
Edmonton, Alberta
T6C 4J5

466-3820
Mr. A. Palynchuk, P. Eng., President.

Development of a new (Special) equipment and processes, i.e., induction heating systems, pipe bending, oilfield pumping systems and peat moss processing.

Commercial Testing Laboratory

ELTRON CANADA LTD.
#4, 4519 - 12 Street N.E.
Calgary, Alberta

276-7443
Dr. L. Fenyvesi, President.

Design and development as related to electronic systems and devices; Data gathering systems, computing systems, software programming. Testing of system components, system electronics and mathematical analysis. Insulation tests, protective relaying systems, vibration analysis, solid state component matching and opto-electronics are some of the services available. Full line of shop and laboratory equipment.

Government Testing Laboratory

ENVIRONMENT CANADA
Environment Protection Service
Aquatic Toxicology Laboratory
14317 - 128 Avenue
Edmonton, Alberta
T5L 3H3

420-2610
Mr. A. Beckett, Biologist.

Performs acute, chronic and sublethal aquatic toxicity tests on samples of industrial/municipal wastes, chemicals, and/or commercial products. Species utilized include trout, daphnia, algae and stickleback (marine toxicity testing).

Government Testing Laboratory

ENVIRONMENT CANADA
Environment Protection Service
804, 9942 - 108 Street
Edmonton, Alberta
T5J 2J5

Mr. G. Sherbin, Director of Environment Control, 420-2572.
Mr. R. Nixon, Head of Laboratory Services, 420-2543.

Main Office

Government Testing Laboratory

ENVIRONMENT CANADA
Environment Protection Service
Chemistry Laboratory
The Northern Forest Research Centre
No. 3001, 5320 - 122 St.
Edmonton, Alberta
T6H 3S5

435-7251
Mr. A. Boyko

Special Equipment: Carbon Analyser, CHN Analyser, Polarograph, Technicon Autoanalyser, Atomic Absorption, Gas Chromatograph, I.R., Leco (Sulphur), UV / Vis.,

Tests of qualitative nature encompassing chemical and physical analysis on waste water, industrial effluents, air pollution tests (chemical and physical), some solid wastes.

Work done primarily for Federal Government but some work is performed for Provincial Government.

Government Testing Laboratory

The Northern Forest Research Centre
5320 - 122 Street
Edmonton, Alberta
T6H 3S5

435-7342
Mr. J. Bell

Conduct microbiological studies relating to water pollution and water pollution control problems by conducting river pollution studies including estimation of bacterial pathogens such as Salmonella, Pseudomanas aeruginosa and the indicator organisms.

Conducts waste substance characterization studies to determine the pathogen content and need for bacterial standards in guidelines produced by D.O.E.

Conducts growth kinetics studies to determine the biodegradability of waste products and to determine the assimilation capacity of receiving streams.

Conducts mutogenicity testing of environmental samples employing the Ames test.

Private Testing Laboratory

ESSO PETROLEUM CANADA
Srathcona Refinery
P.O. Box 1020
Edmonton, Alberta
T5J 2M1

465-8215
Mr. J. Heill, Product Quality Supervisor.

No commercial testing for fee is done except by special arrangement. Facilities exist for physical and chemical analysis of all petroleum products including aviation flight fuels, asphalt, lubricating oil and automotive and heating fuels. Laboratory facilities exist for testing air and water for environmental control and investigation.

Private Testing Laboratory

ESSO RESOURCES CANADA LTD.
Production Research Division
339 - 50 Avenue S.E.
Calgary, Alberta
T2G 2B3

259-0671
Mr. V.C. Larson, Production Research Manager.

No commercial testing for fee is done. Research operations are undertaken in support of petroleum exploration and production in the western provinces and in frontier regions, and for recovery of heavy oil from oil sand deposits. Facilities exist for the physical and chemical testing of petroleum reservoir gases and liquids. The laboratories also include testing facilities for geochemistry, corrosion, metallurgy, core analysis and automation of laboratory and field equipment.

Private Testing Laboratory

FIBERGLAS CANADA LTD
Highway 16 East & 17 St.
Box 595
Edmonton, Alberta
T5J 2L1

467-8851
Mr. D. Gibson, Chemical Process Control Supervisor.

No commercial tests performed. Quality control of processes and products include: glass analysis, resin analysis, control tests on adhesives, asphalt, glass and other viscosities, and fibre measurement. Tests on water and air pollution conducted for own self.

Commercial Testing Laboratory

GENEBIOCHEM LTD.
10515 - 36A Avenue
Edmonton, Alberta
T6J 2H7

436-0426
Ram D. Mehta, Ph. D., Director Research.

Microbiological assays for detecting potential mutagens and carcinogens in the environment: water, air, food, pharmaceuticals, herbicides, and industrial effluents.

Special equipment: centrifuges, spectrophotometers, colony counters, microscopes, pH meters, shaker incubators.

Private Testing Laboratory

GENSTAR CEMENT INDUSTRIES LTD
12640 - 156 Street
Edmonton, Alberta
T5L 4P8

470-1450
Mr. L. Lokanc, Plant Chemist.

No commercial testing is available. This is a quality control laboratory. Tests are done on raw cement materials (clays, shale, sand, limestone, iron ore, gypsum). Chemical and physical tests are carried out on cement according to C.S.A., A.S.T.M. and A.P.I. specifications.

Private Testing Laboratory

GENSTAR GYPSUM LTD.
P. O. Box 6180, Station C
Edmonton, Alberta
T5B 4K6

467-2231
Mr. S. Hovde, Quality Control Laboratory Supervisor.

Perform quality control on gypsum wallboards (physical testing mainly) with periodic tests on raw materials.

Government Testing Laboratory

GLENMORE WATER SUPPLY LABORATORY
P.O. Box 2100
Calgary, Alberta
T2P 2M5

243-9808
Dr. R. Seidner, Laboratory Supervisor.

Process Control Laboratory

No commerical testing is done here - mainly control testing for city water supply. Jar tests relating to chemical dosages and flocculation. This laboratory is engaged in analytical determinations and in matters related to the bacteriological and chemical quality of water.
Equipment includes: B&L colorimeter, amperimetric titrator for chlorine residual, jar tester, pilot filters, Hach turbidimeter, pH meter, electric oven, incubators and sterilizers.

Research Laboratory

Work here includes analysis of heavy metals, trihalomethanes, herbicides, phenols and hazardous spills in source waters.
Equipment includes: atomic absorption spectrophotometer, gas chromatograph, ion chromatograph, mass spectrometer, electrophoresis (teta potential).

Private Testing Laboratory

GOODYEAR CANADA, INC.
P.O. Box 250
Medicine Hat, Alberta
T1A 7E9

527-3353
Mr. H. Beach, Technical Superintendent.

This laboratory does most of the tests related to chemical and physical procedures which pertain to the manufacture of the Goodyear tires. Raw material analysis on antioxidants, stabilizers, carbon blacks, synthetic rubber, etc. are carried out. Physical testing includes all A.S.T.M. and Goodyear Standard Procedure for the release of compounded and finished product materials.

Commercial Testing Laboratory

GUARDIAN INSPECTION SERVICES LTD.
6, 4452 - 64 Avenue S.E.
Calgary, Alberta
T2C 2B3

279-2400
Mr. Dick Ryan, Vice-President.
Mr. K. Lassu, Manager.

Inspection Plant and Field Services for:

1. Tubing and casing inspection - electromagnetic inspection. New casing inspection - ultrasonic wall thickness measurement, full length, 360 degrees.
2. Line pipe inspection - utilizing ultrasonic wall inspection and electromagnetic full body inspection.
3. Automatic pipe straightening - portable cross-roll straightener.
4. Drill pipe inspection - electromagnetic inspection.
5. Tool join refacing.
6. Drill collar inspection - electromagnetic inspection and ultrasonic.
7. Thread inspection on tubing and casing and drill pipe.
8. Sucker rod inspection.

Special Equipment: Self-enclosed building housing all pertinent equipment and operating personnel for in plant line pipe inspection.

Commercial Testing Laboratory

GUARDIAN INSPECTION SERVICES LTD
5605 - 92 Street
Edmonton, Alberta
T6E 3A4

436-5503
Mr. T. Wilkinson, President.

Commercial testing done for fee, using magnetic flux leakage method plus ultrasonic testing for drill pipe, casing, tubing and line pipe inspection.

Private Testing Laboratory

GULF CANADA PRODUCTS COMPANY
Edmonton Refinery
P.O. Box 97
Edmonton, Alberta
T5J 2G9

464-8639
Mr. E. Long, Superintendent of Technical Services.
Mr. F. Stephenson, Laboratory Supervisor.

Facility is a quality control laboratory. No commercial tests accepted. Facilities are available for control testing of intermediate and finished petroleum products produced from crude oil.

Private Testing Laboratory

HALLIBURTON SERVICES LTD.
5140 - Skyline Way N.E.
Calgary, Alberta
T2E 6V0

269-6141
Mr. W.H. Beecroft, Division Chemist.

No commercial testing facilities are available. Testing services are provided to oil field and industrial clients in the areas of drilling fluids, oil field cements, drill stem recovery, oil field stimulation and industrial cleaning of refineries and chemical plants.

Commercial Testing Laboratory

HANSON MATERIALS ENGINEERING (WESTERN) LTD.
7450 - 18 Street
Edmonton, Alberta
T6C 4E6

464-7916
Dr. A. Hanson, P. Eng., President.
Mr. G.D. Stuart, P. Eng., General Manager.
Mr. L. Hunt, P. Eng., Director of Engineering.

This is a firm of consulting metallurgical engineers and non-destructive testing engineers which performs the following kinds of tests on a fee basis:

1. Metallographic Examination of Ferrous and Non-Ferrous Metals and Alloys

2. Metallurgical Engineering Investigation of Service Failures.
3. Investigation of Corrosion Problems.
4. Qualification of Welding Procedures.
5. Quality Control of Heat Treatment Procedures.
6. Mechanical Testing:
  (a) Hardness testing.
  (b) Microhardness testing.
  (c) Tensile testing.
  (d) Impact testing.
  (e) Guided bend testing.
7. In house Chemical Analyses of Metals and Alloys.
8. Radiographic Examination of Castings, Forgings and Weldments.
9. Ultrasonic Flow Detection, Corrosion Surveys and Thickness Measurements.
10. Magnetic Particle and Dye Penetrant Flow detection surveys.
11. Eddy Current Flow Detection.
12. Ministry of Transport and Department of National Defense Approved for Aircraft Structure Inspection.
13. Pipe Mill Inspection.
14. Visual Inspection Certification to CSA W178
15. Commercial Heat Treatment Service.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
221 - 18 Street S.E.
Calgary, Alberta
T2E 6J5

248-4331
W.A. Slusarchuk, Branch Manager.
Mr. B. Dowse, Manager - Geotechnical Division.
R.A. Hemstock, Manager - Environment Division.
D. Empey, Manager - Materials Engineering - Science Division.
Mr. Hieken, Manager - Metallurgical Division.

The Company's services are offered through five divisions: Geotechnical, Environmental, Materials Engineering and Science, Metallurgical, and Analytical Chemistry.

Geotechnical Division

The Geotechnical Division offers a complete range of laboratory and field testing equipment related to soil mechanics, foundation engineering, earthwork engineering, slope stability evaluation, hydrogeology, terrain analysis, engineering geology, permafrost, muskeg, and engineering geophysics. This includes laboratory equipment to determine strength, consolidation, compaction, and permeability characteristics of soil, rock and permafrost as well as equipment for routine tests such as water content, density, liquid limit, plastic limit, specific gravity and others. In addition, specialized testing in temperature controlled cold rooms is carried out on frost heaving and thaw settlement of freezing and thawing soils.

A complete range of soil sampling equipment is maintained in our laboratories. In addition, equipment is also on hand for field monitoring of in situ densities and water contents, pore water pressures, slope movements, soil settlements, ground temperatures, ground resistivity, ground seismic response, and ground vibrations resulting from blasting, pile driving, compaction equipment and traffic.

Environmental Division

The Environmental Division offers service in the fields of reclamation, plant ecology (including forest, tundra and grassland ecology), environment impact studies and the application of remote sensing to environmental monitoring and pollution studies.

Materials Engineering & Science Division

The Materials Engineering & Science Division offers services to the construction industry which include physical tests and evaluation of cement, fly ash, concrete aggregates, concrete admixtures and hardened or plastic concrete, grouts, mortar and mortar materials, reinforcing steel and sulphur modified concrete, wood, polymers, glass and ceramics; microscopical evaluation; inspection of construction operations; failure investigations and remedial recommendations;

non-destructive testing of concrete including ultrasonics and nuclear densometry; consulting in regard to materials properties, selection, supply, processing and use; quality control for precast concrete plants, specialty products such as concrete pipes, concrete poles, concrete blocks; concrete and soil-cement mixes, designs and quality control; materials sources discovery and related surveys; engineering certificates for housing projects.

The Asphalt section of the laboratory contains comprehensive testing facilities pertaining to viscoelastic materials with emphasis on asphalts, asphalt products and bituminous paving mixes including sulphur modified mixes. The laboratory has significant specialization in viscometry, reference testing, as well as nuclear testing capability.

Metallurgical Division

Engineering and Inspection Services are available from this Division covering pressure vessels, piping, structural steel, hoists, lifting equipment, and many other components.

Inspection equipment is mostly portable and includes gamma ray mobile laboratories, ultrasonic inspection apparatus, dye penetrant and magnetic particle equipment and hardness testers. Corrosion studies and routine plant maintenance inspections are a specialty. Ultrasonic evaluation of castings and forgings, failure analyses and metallurgical laboratory evaluations are also available.

This laboratory is equipped with a complete range of routine physical metallurgical test equipment and also includes equipment to facilitate such special analyses as required by fracture mechanics, fatigue studies, X-ray diffraction and optical microscopy.

In addition, we undertake special research and development projects in the field of metallurgy. The development of exceptionally tough and abrasion resistant low alloy steels for use in Arctic environments; evaluation of such new fracture mechanics techniques as J-integral and C.O.D.; and identification of corrosion products through computer analyzed X-ray diffraction data are just a few areas of current development.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
4810 - 93 Street
P.O. Box 746
Edmonton, Alberta
T5J 2L4

436-2152
Mr. R. Dubas, Branch Manager.

Hardy Associates was formed in 1951 and is the operating company covering a wide range of consulting engineering and professional services. The company specializes in Goetechnical and Materials Engineering, Environmental Earth Sciences, Engineering Geology, Hydrogeology, Engineering Geophysics, Metallurgical Engineering, Materials Testing, Plant ecology, Air, Soil and Groundwater Contamination, and Analytical Chemistry. The company operates offices and laboratories in six Alberta cities and a total of thirteen in Canada including Vancouver and Halifax, with a staff of approximately 600 people. Each discipline is staffed with proffesionals supported by highly skilled technicians and a full range of modern laboratory, library and computer facilities.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
Analytical Chemical Division
4810 - 93 Street
P.O. Box 746
Edmonton, Alberta
T5J 2L4

436-2152
Dr. K. Peters

The new Analytical Chemical Division will provide a complete analytical service to industry. This will include soils, rocks, coal, minerals, concrete, metals and ceramics routinely. Water analyses, groundwater studies, industrial air and water effluents will be tested in the Environmental area. Analysis of oil and gas (both sour and refined) is available.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
Geotechnical Division
4810 - 93 Street
P.O. Box 746
Edmonton, Alberta
T5J 2L4

436-2152
Mr. J. Fujino

The Geotechnical Division (the largest) includes within its scope the application of Classical and Modern Theories of Soil Mechanics, the application of the principles of engineering geology, geomorphology, geophysics and hydrology, and the practice of foundation engineering.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
Materials Engineering Division
4810 - 93 Street
P.O. Box 746
Edmonton, Alberta
T5J 2L4

436-2152
Mr. S. Gurjar, M.B.A., M. Eng., P. Eng.,
Division Manager.

The Materials Engineering Division of the Edmonton Branch offers a comprehensive testing, inspection and consulting engineering service to the construction industry. The division provides routine field and laboratory testing of engineering construction materials such as soils, concrete, soil cement, asphaltic concrete, bituminous materials, agregates, wood, etc., for monitoring the quality of materials being employed on construction projects. The division provides construction inspection services to enforce project specification and offers a wide range of expertise including materials and product evaluation mix designs and analysis, failure investigations of highways, structures and components, fire investigations, specification preparation, project management.

Special equipment: portable pulse velocity equipment for in-place concrete evaluation, nuclear density equipment for rapid determination of soil, asphalt and concrete density, nuclear asphalt content equipment for rapid onsite asphalt content determinations, diamond core drilling equipment for undisturbed sample recovery of concrete and asphalt and CAPO & LOK Test Systems for in-situ concrete testing. The division also maintains two mobile laboratories for remote area projects.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
Metallurgical Division
9405 - 51 Avenue
Edmonton, Alberta
T6E 4W8

438-3779
Mr. G. Marit, P. Eng..

The Metallurgical Division provides a broad and varied range of physical, non-destructive testing and inspection. Laboratory services and consulting engineering in the practice of metallurgy. The Division also has the capabilities of offering like services in the fields of ceramics, plastics, protective coatings and other non-metallic materials.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
232 - 22 Street North
Lethbridge, Alberta
T1H 3R7

327-7474
Mr. Bill Dodd, Lab Supervisor.

This lab tests asphalt and asphalt mixes, cement, concrete, constuction materials, and soils.

Commercial Testing Laboratory

HARDY ASSOCIATES (1978) LTD.
4, 5551 - 45 Street
Red Deer, Alberta
T4N 1L2

343-8566
Mr. Ron Tenove, Manager.

This branch laboratory is equipped for concrete testing, field control testing of soils, inspection and testing on asphaltic concrete and soil cement, aggregate analysis, and construction inspection.

Commercial Testing Laboratory

HOGGAN ENGINEERING AND TESTING LTD.
8803 - 50 Avenue
Edmonton, Alberta
T6E 5H4

465-9714
J.E.F. Hoggan, P. Eng..

Field and laboratory testing and control of Civil Engineering materials, specializing in:

Soils
Foundation investigations
Compaction testing and control
Stability analysis

Concrete
Testing, inspection, control
Aggregate tests and mix designs
Statistical analysis of test data

Asphalt
Testing, inspection and control
Aggregate tests and mix design
Foamed asphalt designs and control

Commercial Testing Laboratory

HYALOG OILFIELD SERVICES LTD
1201 - 76 AVENUE
Edmonton, Alberta
T6P 1P2

467-9717
Mr. W. Johnson, General Manager.

This company inspects and repairs oilfield tubular goods. It does magnetic particle, ultrasonics and magnetic induction tests. A special service is drilling out cement from pipe.

Commercial Testing Laboratory

HYCAL ENERGY RESEARCH LABORATORIES LTD.
4758 - 14th Street N.E.
Calgary, Alberta
T2E 6L7

230-1541
D.W. Bennion, Project Manager.

Hycal's objectives are to perform applied research and consulting services to the petroleum industry in the area of reservoir engineering and enhanced recovery. It offers the following services: reservoir engineering laboratory studies, special phase behavior and core displacement studies, miscible flood studies, thermal recovery studies, numerical simulation of laboratory experiments, numerical simulation of pilot and field projects.

Tests which Hycal can perform on petroleum production: enhanced recovery, miscible flood core displacement, carbon dioxide displacement, immiscible gas displacement, waterflood displacement, steamflood displacement, water alternating gas displacement, slim tube displacement, P-V-T evaluation and phase equilibria.

Private Testing Laboratory

I - XL INDUSTRIES LTD.
P.O. Box 70
Medicine Hat, Alberta
T1A 7E7

526-5901
Mr. M. Shayna, Director of Research and Product Development.

Some tests may be done on ceramic refractory and building materials, such as clays and shales. The laboratory has complete facilities for testing ceramic clays and glazes, including a pug mill and a high- temperature kiln, temperature gradient furnace, pyrometric cone equipment, and physical brick testing.

Government Testing Laboratory

INSTITUTE OF SEDIMENTARY AND PETROLEUM GEOLOGY CANADA
3303 - 33 Street N.W.
Calgary, Alberta
T2L 2A7

284-0110
Dr. W.W. Nassichuk, Director.

Geological research centre with ancillary paleontological and geochemical laboratory services, for in house purposes only. The core and sample repository stores core from Northwest Territories wells, and cuttings samples from the four Western Provinces, the Northwest Territories and Eastern and Western Continental Shelf areas. The core from Northwest Territories and cuttings from all areas except Alberta are available for examination.

Commercial Testing Laboratory

INTERIOR OIL ANALYTICS LTD.
100, 10716 - 176 Street
Edmonton, Alberta
T5S 1G7

483-1036
Bud Beaton, President.

This independent laboratory specializes in used crankcase/lubricating oil analysis for preventive maintenance.

Services performed by Interior Oil Analytics Ltd.

1. Wear metal analysis for aluminum, silicon (dirt), copper, chrome, iron and lead.
2. Viscosity indicating saybolt seconds of test oil rated at 100 degrees F. converted to S.A.E. for meaningful interpretation.
3. Water or anti-freeze by chemical reaction.
4. Fuel dilution (Penskey Martin Closed Cup).
5. Infrared analysis showing oxidation, nitration, sulphur products, additive depletion, water and anti-freeze.
6. Coolant (pH value, reserve alkalinity, solution strength).
7. Common tests for quality control for diesel, gasoline and other fuels. (Not octane or cetane ratings).

Commercial Testing Laboratory

INTERNATIONAL RADIOGRAPHY AND INSPECTION SERVICES (1976) LTD
9937 - 60 Avenue
Edmonton, Alberta
T6E 0C7

437-2022
Mr. B. Schmierer, Manager.

Visual inspection. Weld inspection by gamma ray, X-ray, ultrasonic materials inspection, dye inspection. Structural steel inspection is done. Inspection of all types of aircraft. Has D.O.T. and Canadian Forces qualifications and license for Eddy Current, Ultrasonic and X-ray inspection. Thermovision with A.G.A. Infrared Unit.

Commercial Testing Laboratory

INTERNATIONAL RADIOGRAPHY AND INSPECTION SERVICES (1976) LTD.
4041 - 11 Street S.E.
Calgary, Alberta
T2G 3H1

243-5633
Mr. G. Schultz, Branch Manager.

Visual inspection is carried out. Welding inspection is done by gamma ray, X-ray, ultrasonic inspection, M.P.I. and dye inspection. Structural steel inspection and aircraft inspection are also done. Thermovision camera, for infrared heat sensing.

Commercial Testing Laboratory

ITRES RESEARCH LTD.
3512 - 33rd Street N.W.
Calgary, Alberta
T2L 2A6

284-4758
Werner Kesel, President.

ITRES has expertise in and equipment for optical testing and digital circuitry testing.

Commercial Testing Laboratory

J.A. SMITH AND ASSOCIATES LTD.
#13, 6120 - 3 Street S.E.
Calgary, Alberta
T2H 1K4

253-4423
Mr. James A. Smith, P. Eng., President.

Physical tests can be performed at this laboratory or conducted under direct supervision, on soils, concrete, concrete aggregates, mortar, asphalt, steel, wood, coal, and earthen construction materials.

Commercial Testing Laboratory

J.R. PAINE AND ASSOCIATES LTD.
2204 - 84 Avenue
P.O. Box 5993 Station L
Edmonton, Alberta
T6C 4G5

464-5222
Mr. J.R. Paine, General Manager.

This laboratory is equipped to conduct most physical tests on soil, concrete, asphalt, soil cement and related materials. A professional staff and modern equipment are available for design testing, as well as field control testing of the above items.

Commercial Testing Laboratory

J.R. PAINE AND ASSOCIATES LTD.
11020 - 89 Avenue
Grande Prairie, Alberta

532-1515
Mr. L. Strynadka, Laboratory Supervisor.

This laboratory is equipped to conduct most physical tests on soil, concrete, asphalt, soil cement and related materials. A professional staff and modern equipment are available for design testing, as well as field control testing of the above items. Some of the tests are forwarded to the Edmonton lab for completion.

Commercial Testing Laboratory

JASS LABORATORIES LTD.
3510 - 6 Avenue North
P.O. Box 22
Lethbridge, Alberta
T1J 3Y3

328-1133
Jan Jass, Chemist.

Jass Laboratories serves agricultural and industrial needs in soil testing, soil analysis, feed analysis, consultation, water analysis, analytical chemistry.

Commercial Testing Laboratory

JOHNSTON TESTERS
A Division of Schlumberger Canada Limited
950, 707 - 7 Avenue S.W.
Calgary, Alberta
T2P 3H6

266-7511
Mr. T. Grace, General Manager.

This company has complete facilities for measuring the pressure, permeability, fluid or gas content, and productivity index of sub-surface reservoir formations. Coarse quantitative and qualitative analyses can be performed in the field.

Special Equipment:

1. Ruska dead weight tester and temperature bath for the calibration of pressure recording instruments and gauges of the types used in measuring sub-surface reservoir pressures in oil well bore holes.
2. 80-Ton horizontal compression/tension hydraulic press with 17 foot bed.

Commercial Testing Laboratory

KINETIC ENVIRONMENTAL RESEARCH LABORATORIES LTD.
Mailing address: P.O. Box 1037, Leduc, Alberta
1204-8A Street
Nisku, Alberta
T0C 2G0

955-7656
Mr. D. Erickson
Mr. E. A. Callin

This is an Alberta owned and operated company which utilizes advanced instrumentation to provide industry and goverment with a analytical chemical testing and consulting service.

Kinetic is equipped with highly complex and sophisticated instrumentation including Gas Chromatography, Mass Spectrometry, Atomic Absorbtion, UV/visible spectrometry, Autoanalyzers, and Electrochemical Instrumentation.

Commercial Testing Laboratory

KLOHN LEONOFF CONSULTANTS LTD.
#15, 6320 - 11 Street S.E.
Calgary, Alberta
T2H 2L7

259-4114
Mr. K.R. Gillespie, P.Eng., Manager, Geotechnical.
Mr. D.N. Davidson, Manager.

The firm offers services in the civil, hydraulic and geotechnical engineering fields. The specialties include soil mechanics, rock mechanics, foundations, hydrology, hydraulics, groundwater, physical environmental assessments as well as material testing facilities.

Commercial Testing Laboratory

LUDWIG'S WELDING CONSULTING LTD.
4027 - 14th Street S.E.
Calgary, Alberta
T2G 3K6

262-7072
Wayne Ludwig, President.

Services include: materials testing laboratory, welder qualification test, welding procedures, trouble shooting, visual inspection, quality control, failure analysis and chemical analysis.

Special equipment: 120,000 lbs. Universal Tester Satec (tension tests, bend tests, nick break), 240 ft. lb. impact tester, hardness testers, polishers, grinders, etching equipment, stereomicroscope, metallurgical microscope with microphotographic capabilities, polaroid MP-4 for macrophotography, and Baird Atomic Vaccuum direct reading spectrometer Model VS-5.

Commercial Testing Laboratory

METALTA TECHNOLOGY LTD.
5823 - 20 Street S.W.
Calgary, Alberta
T3E 1R7

243-1664
J.M.E. Wallbridge, P. Eng., Managing Director.

Primary areas of interest are: failure anaylsis, materials specification, quality plans and audits, metallurgical engineering and welding.

Commercial Testing Laboratory

METRO TECH SYSTEMS LTD.
1075 McTavish Road N.E.
Calgary Internationl Airport
Calgary, Alberta
T2E 7G9

276-9431
W.T. Tanguay, Chief Chemist.

Metro Tech has a Used Lubricating Oil analysis laboratory for the purpose of preventative maintenance and for evaluation and determination of the wearing features of lubricated equipment. Their expertise in the testing of other finished petroleum products permits them to act as consultants for users of petroleum products. Metro Tech also conducts test quantitatively for metals in liquid media and other materials.

Metro Tech does not engage in assay analysis, but will accept prepared solutions for the quantitative determination of metals by Inductive Coupled Argon Plasma Spectrometry.

Commercial Testing Laboratory

MONENCO ANALYTICAL LABORATORIES
Division of Monenco Consultants Ltd.
2023 - 2 Avenue S.E.
Calgary, Alberta
T2E 6K1

273-2525
Dr. John R. Dean, General Manager.
Dr. Norman W. Chiu, Laboratory Manager.

Monenco provides analytical support services for industry and government. This group of proffessionals has the expertise to accurately analyse samples of water, soil sediment, air, plant tissue, fish and industrial wastes.

Commercial Testing Laboratory

NATIONAL MUD CONTROL
200, 320 - 23 Avenue S.W.
Calgary, Alberta
T2S 0J2

237-0346
Joanne Baynton

Services: suppliers of drilling mud and chemicals used in drilling, drilling engineering consultants, drilling mud service.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Atlantic Research Laboratory
1411 - Oxford Street
Halifax, Nova Scotia
B3H 3Z1

Dr. F.J. Simpson, Director, ph (902) 426-8278.

Research activities:

1. High temperature chemistry - constitution of slags and glasses, hydrogen diffusion in steel, viscosity of slags, sulfur removal from coal, coke and steel.
2. Analytical chemistry - marine analytical chemistry standards, mass spectrometry, atomic absorption.
3. Biophysics - structure of water and chemical hydrates, infrared spectrophotometry.
4. Chemistry of Natural Products - nuclear magnetic resonance spectrometry, determination of molecular structures, chemical and biological synthesis.

5. Physical analysis - electron microscopy, X-ray crystallography.
6. Lichenology - algal fungal symbiosis, lichen chemistry and chemotaxonomy.
7. Marine plants - biochemistry and physiology, chemistry, ecology, systematics and life cycles, genetics cultivation.
8. Microbiology - chemistry of mycotoxins, effect of mycotoxins on ruminants, fungal ecology.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Engineering Laboratories
Industrial Materials Research Institute
750 Bel-Air Street
Montreal, Quebec
H4C 2K3G.L. Bata, Director, ph (514) 935-8513.

Research activities:

1. Process technology.
2. Material characterization.
3. Prediction of service performance.
4. Systems and instrumentation.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Biological Science Laboratories
Division of Biological Sciences
Montreal Road
Ottawa, Ontario
K1A 0R6

Dr. C.T. Bishop, Director, ph (613) 995-6600.

Research activities:

1. Animal and cell physiology - mechanisms of mammalian cell proliferation.
2. Environmental physiology
3. Microwaves - biological effects on microwaves, radio frequency absorption in man.
4. Animal facility - maintenance and breeding of experimental animals.
5. Food technology - biogas fermentation, high humidity refrigerated storage of fruits and vegetables.
6. Microbiology
7. Molecular genetic - organization and expression of eukaryotic genes and the utilization of recombinant DNA techniques in fundamental studies and industrial applications.
8. Molecular biophysics.
9. Ecotoxicology - transfer and transformations of mercury species, mechanisms of toxicity.
10. Biomathematics - system analysis, modelling of ecosystem, statistical analysis, design of experiments.

11. Molecular biochemistry.
12. Cell biophysics.
13. X-ray crystallography.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Division of Building Research
Montreal Road
Ottawa, Ontario
K1A 0R6

Dr. D. C. MacPhail, Director.

The laboratories of the National Research Council are set up primarily for research purposes. Several of the Divisions may carry out testing when special facilities not available elsewhere are required or when some element of research is involved. The Division of Building Research carries out certain tests on this basis on materials and constructions such as fire resistance tests, sound absorption and sound transmission tests, and thermal, rain and air leakage tests on windows and wall sections.

Tests facilities for commercial testing laboratories are reported in a directory published by the Canadian Testing Association, 20 Carlton Street, Toronto 2, Ontario.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Engineering Laboratories
Division of Mechanical Engineering
Montreal Road
Ottawa, Ontario
K1A 0R6

E.H. Dudgeon, Director, ph (613) 993-2424.

Research activities:

1. Analysis laboratory - computer modelling and simulation, mathematical modelling, simulation facility and methods, vehicle dynamics, mechanical and control systems, process operations and scheduling.
2. Control systems and human engineering laboratory.

3. Engine laboratory.
4. Fuels and lubricants laboratory.
5. Gas dynamics laboratory.
6. Hydraulics laboratory.
7. Mathematical modeling.
8. Low temperature laboratory.
9. Manufacturing technology center.
10. Marine dynamics and ship laboratory.
11. Arctic vessel and marine research institute.
12. Railway laboratory.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Engineering Laboratories
Division of Electrical Engineering
Montreal Road
Ottawa, Ontario
K1A 0R8

Dr. J.Y. Wong, Director, ph (613) 993-1384.

Research activities:

1. Medical engineering - biomedical computing and data retrieval, aids for the handicapped, ultrasound.
2. Rehabilitation technology.
3. Computer Graphics - pattern recognition, image processing, intelligent robotics, computer video graphics, CAD Graphics, numerical control, cardiac studies, real time digital systems, numerical analysis.
4. Electronics engineering - photovoltaic power systems, sensor development, real time signal processing, instrument coordination office.
5. Electromagnetic engineering - optical processing, microwave heating, precipetation radar, antenna design and development, theoretical EM studies, sea ice thickness.
6. Electron physics - UVH technology, surface science, quantum electronics, liquid helium, lanthanum hexaboride.
7. Power engineering - impulse measurements, HVDC research, precision measurements, dielectrics.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Engineering Laboratories
National Aeronautical Establishment
Montreal Road
Ottawa, Ontario
K1A 0R6

Dr. G.M. Lindberg, Director, ph (613) 993-2427.

Research activities:

1. Flight research laboratory.
2. Unsteady aerodynamics.
3. Low speed aerodynamics.
4. High speed aerodynamics laboratory - wind tunnel testing techniques, aerodynamics of wings and bodies, basic fluid dynamics, public safety project.
5. Robotics.
6. Structures and materials laboratory - structures, theoretical and applied mechanics, engineering physics, materials.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Physical and Chemical Science Laboratories
Division of Chemistry
Montreal Road
Ottawa, Ontario
K1A 0R6

ph (613) 993-2332 Dr. D.M. Wiles:po Director

Research activities:

1. Analytical chemistry.
2. Chemical engineering.
3. Colloid and clathrate chemistry.
4. High polymer chemistry.
5. High pressure chemistry.
6. Kinetics and catalysis.
7. Metallic corrosion and oxidation.
8. Solid state chemistry.
9. Textile chemistry.
10. Chemical Physics.
11. Hydrocarbon chemistry.
12. Molecular spectroscopy.
13. Organic chemistry.
14. Photochemistry and kinetics.
15. Theoretical chemistry.
16. Thermochemistry.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Physical and Chemical Science Laboratories
Herzberg Institute of Astrophysics
Sussex Drive
Ottawa, Ontario
K1A 0R6

Dr. J.L. Locke, Director, ph (613) 992-7686.

Research activities:

1. Astronomy.
2. Planetary sciences.
3. Space physics.
4. Spectroscopy.
5. Spectroscopy of larger molecules.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Physical and Chemical Sciences Laboratories
Division of Physics
Montreal Road
Ottawa, Ontario
K1A 0S1

Dr. P.A. Redhead, Director, ph (613) 993-1208.

Research activities:

1. Noise and vibration.
2. Electrical and time standards.
3. Heat and thermometry.
4. High energy physics.
5. Laser and plasma physics.
6. Mechanical and optical physics.
7. Optics.
8. Photogrammetric research.
9. Solid state science.
10. X-rays and nuclear radiations.
11. 35 MeV electron linear accelerator.
12. 4 MeV positive ion accelerator.

Government Testing Laboratory

NATIONAL RESEARCH COUNCIL CANADA
Biological Sciences Laboratory
Prairie Regional Laboratory
110 - Gymnasium Road, University Campus
Saskatoon, Saskatchewan
S7N 0W9

Dr. B.M. Craig, Director, ph (306) 665-4191.

Research activities:

1. Bacteriology - microbial degradation of compounds related to pesticides, industrial fermentations, waste products from spent bleach.
2. Electron microscopy - ultrastructural studies.
3. Mycology - metabolism and reproduction of pythiaceous root rots, lignin degradation of fungi, biosynthesis of antibiotics, toxins.
4. Nitrogen fixation - research and physiologial evaluation of crop productivity.
5. Crop utilization.
6. Fermentation.
7. Plant cell culture studies.
8. Insect studies.
9. Chemistry of natural products - carbohydrates, proteins, fats and oils, plant extractives.

Commercial Testing Laboratory

NORTH AMERICAN INSPECTION SERVICES LTD.
9225 - 58 Avenue
Edmonton, Alberta
T6E 0B7

435-4886
Mr. R. Roth, Division Manager.

This firm is equipped to do X-ray, Gamma ray, magnetic particle inspection, ultrasonic tests, and dye inspection on welds, shafts and other machine parts. Visual mechanical inspection, penetrants, corrosion measurements, concrete testing, radioactive pipeline scraper tracing, hardness testing, environmental testing and expediting can also be arranged.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Chemical and Industrial Processes
Chemical Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9143
Mr. E. R. Raypold, Head.

A fully equipped laboratory is available for chemical analysis. No commercial testing is done unless the test cannot be carried out by a local chemical laboratory.

Special Equipment:

1. Spectrophotometer (IR, UV, visible).
2. Gas chromatography.
3. N.M.R.
4. Polarography.
5. Atomic absorption.
6. Leco-Furnace.
7. Fluorometer.
8. High vacuum line
9. High pressure liquid chromatography
10. Mass spectrometry.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Health Sciences Department
Biological Sciences Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9161
Dr. F. Siddiqui, Head.

A fully equipped laboratory is available for chemical analysis of air and water pollutants. No commercial testing is done unless the test cannot be carried out by a pollution laboratory.

Special Equipment: spectrophotometer (uv, visible), gas chromatograph (flame ionization, flame emission,electron capture), atomic absorption spectrophotometer, fluorimeter, Nitrous Oxide Analyzer, flame photometer, Ozone analyzer, CO Analyzer, TOC Analyzer.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Automotive-Diesel Division
Automotive Section
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9137
Mr. G. Johnston, Section Head.

The facilities of this section include an automotive chassis dynamometer on which a variety of vehicle road tests can be made. These tests include speedometer accuracy, power output, electrical and fuel system checks,and E.P.A. tests.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Automotive-Diesel Department
Heavy Duty Section
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9314
Mr. A. Gannon, Section Head.

No commercial testing is done. Equipment here is for educational and instructional purposes only. Tests can be run on diesel and gasoline engines to 600 H.P. and 5,000 r.p.m.'s with recording instruments for all operating characteristics, horse power, torque, exhaust temperature, fuel consumption, and fuel ratios.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Construction Department
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9146
Mr. W.B. Landers, Department Head.

The equipment in this department is essentially for demonstration purposes with students. Testing will be undertaken in the Building Science, Concrete, and Forestry Laboratories, providing the equipment is available and the work cannot be readily undertaken commercially. Special problems relating to Practical Building Construction and Winter Construction will be given preference. Routine testing within the department is restricted to sieve analysis in relation to masonary products. Special equipment include: sieve analysis equipment, Sward Hardness Rocker, Washability and Abrasion Tester, Paint Drying Time Recorders, Micro-Depth Thickness gauge, Flexibility Tester.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Construction Department, Forest Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9383
Mr. M.K. Lalor, Head.

No commercial tests performed, facilities for student teaching purposes only. Tests performed on forest soils, analysis of fertility, physical analysis.

Government Testing Laboratorv

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Engineering Sciences
Building Construction, Technology Section
Plaza Two, 11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9352
Mr. J.D. Matheson, Head.

No commercial tests performed, facilities for teaching purposes only. Has all concrete and aggregate testing facilities. Most standard soil testing procedures are performed.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Electrical Department
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9147
Mr. C.T. Ayles, Head.

The Electrical Department is prepared to offer testing facilities in the following areas:

1. Circuit Breaker testing up to 2500 amps with timing clock facilities.
2. Speed-torque characteristics and locked rotor tests on AC and DC motors up to 7 1/2 horsepower.
3. Instrument testing to 1% accuracy of 0 - 600 volts, and 0 - 10 amps AC, and 0 - 1000 volts and 0 - 150 amps DC.
4. Telephone type relay testing to operate and release current, spring tension and timing.
5. Transistor and semi-conductor diode characteristic curve tracing.
6. Audio frequency harmonic distortion tests.
7. Logic control systems proving facilities using versatile transistorized and integrated circuits.
8. 0 - 150 MHz reading oscilloscopes.
9. Wave form generation.
10. Frequency counters up to 1 GHz.
11. Testing facilities for telecommunications equipment.
12. Data set and telephone line testing.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Mechanical Department
Air Conditioning, Refrigeration and Power Engineering
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9164
Mr. J. Aanen, Head.

No commercial testing performed. Do air flow testing and calibration (pertaining to air flow) of instruments. Special Equipment includes air flow test beds.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Industrial Division
Mechanical Department
Industrial Practices
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9218
Mr. L. Turner, Head.

Commercial work is not undertaken, however, arrangements may be made with staff to perform special services not commercially available. Government Departments who require metal machining facilities not listed could usually be accomodated provided the time element was not critical.

Main facilities are in the field of precision dimensional measurements, and include:

1. Linear measurement, using mechanical, pneumatic, optical and electrical comparators.
2. Angular measurement with sine bars, optical comparator, and auto-collimator.
3. Straightness and flatness, with optical or mechanical equipment.
4. Surface texture (finish) average reading or graphical print-out obtainable.
5. Thread measurement. All features of thread elements, including profile, major, minor and pitch diameters, pitch error.

Special Machining Facilities:

1. Metal machining by electric discharge process for difficult to machine metals.
2. Two axis numerical control contour milling or drilling (arcs, angles, tangents).

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Technology Division, Academic Studies Department
Physics Section
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9131
Mr. P.K. Bell, Head.

No commercial tests performed. For student teaching purposes only. However, arrangements can be made when other facilities are not available.

Acoustics:

1. Reverberation times.
2. 1/3 octave filtering for noise analyses.
3. Noise dosimeter.

Radiation Physics:

1. 2 multi-channel analysers.
2. 1 single-channel analyser.
3. 1 liquid scintillation counter.
4. plus numerous sources for teaching facilities.

Other Special Equipment:

1. High vacuum system.
2. Stroboscope.
3. Digital multi-meter.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Technology Division, Electronics Department
Earth Resources Section
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9225
Mr. E. Lipsett, Head.

Four divisions: resources engineering, minerals, petroleum, and water resources, including geophysics (geophysical testing). Divisions have laboratory facilities for student instruction only. No outside consultation or testing considered.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Technology Division, Engineering Sciences Department
Civil Engineering Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9154
Mr. D. Bloedorn, Head.

As a general policy, the Civil Section does not undertake engineering testing of a routine nature. Testing is done only when the particular test might involve equipment that cannot be found through commercial facilities.

The laboratory is equipped to conduct laboratory tests associated with soils, asphalt, soil cement, cement and concrete.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Technology Division, Engineering Sciences Department
Materials Engineering Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9143
Mr. L. Juse, Head.

Facilities for destructive and non-destructive testing plus metallography on metallics materials, plastics (some) plus additional mechanical tests on assorted materials. Have well-equipped laboratory for basic materials testing.

Consideration given to outside tests.

Government Testing Laboratory

NORTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Technology Division, Engineering Sciences Department
Plastics Engineering Technology
11762 - 106 Street
Edmonton, Alberta
T5G 2R1

427-9143
Mr. J. Foster, Program Head.

Work on plastics manufacturing processes, i.e. injection molding, thermoforming, fluidized bed coating, high frequency heat sealing , P.V.C. compounding and pelletizing, pipe and profile extrusions, blow molding, compression molding, etc., plus testing plastic test equipment, i.e. plasti-corder, melt index, viscosity.

Consideration given to outside requests.

Special Equipment:

1. Torque rheometer.
2. Graded gel-block tester.
3. Brookfield viscometer.
4. Barcol hardness tester (fibre reinforced plastics).
5. Shore - D hardness tester.

Government Testing Laboratory

NORTHERN FOREST RESEARCH CENTRE
Canadian Forestry Service
Air Pollution Laboratory
5320 - 122 Street
Edmonton, Alberta
T6H 3S5

435-7210
Dr. G.D. Hogan, Head.

Primarily research for the Federal Government, some work done for the Provincial Government.

For public - may identify problems but no testing on air pollution problems.

Government Testing Laboratory

NORTHERN FOREST RESEARCH CENTRE
Canadian Forestry Service
Soils Laboratory
5320 - 122 Street
Edmonton, Alberta
T5G 2R1

435-7210
Mr. Y.P. Kalra, Head.

Performs soil analysis for chemical and physical properties and plant and water analysis for chemical properties. Tests done for internal use only, no commercial tests accepted. Laboratory receives samples from forests (forest fertilization projects, hydrology, forest stand establishment research and coniferous and deciduous timber stands), tree nurseries, shelterbelts and agricultural areas. Modifies and develops analytical techniques.

Special Equipment: Auto-Analyzer, Coleman colorimeter, pH meter, conductivity meters, atomic absorption spectrophotometer plus other standard equipment.

Commercial Testing Laboratory

NORTHWEST INSPECTION SERVICES (1977) LTD.
2nd Floor, 7907 Flint Road S.E.
Calgary, Alberta
T2H 1G3

259-5876
Mr. D.L. Gratton, General Manager.

Laboratory and field facilities are available for inspection and grading of wood poles, and testing of timber and forest products. Testing includes analysis of preservative in wood products and treating solution. Visual inspections are also carried out.

Commercial Testing Laboratory

NORWEST SOIL RESEARCH LTD.
6788 - 99 Street
Edmonton, Alberta
T6E 5B8

432-7755
Jean Michel Crepin, P. Ag., Director.

Laboratory services include: forage and feed analysis, soil quality, plant tissue analysis, water analysis, seed testing, microbiological counts, pesticide residues, enzymatic assays, and soil fertility.

Government Testing Laboratory

ONTARIO RESEARCH FOUNDATION
Sheridan Park
Mississauga, Ontario
L5K 1B3

822-4111
Mr. C.E. Symonds, Director - Department of Field Services.

Although this institution is primarily concerned with contract research, undertaken for various industrial firms and for government departments, many facilities for specialized testing are available at the Foundation.

Disciplines of O.R.F. offering special testing facilities are:

1. Chemistry:
(a) Air pollution Laboratory - ambient air monitoring - source emission studies, odour threshold measurements.
(b) Building materials - organic and inorganic.
(c) Organic - compounds, trace analysis, e.g., pesticide residues, syntheses.
(d) Applied Microbiology -food preservation, enzyme technology, waste disposal, etc.
(e) Paints and Protective Coating Laboratory.
(f) Ceramics and Glass Laboratory.
(g) Wood Science Laboratory - pulp and paper studies, utilization of wood wastes, bark, etc.

Special Equipment: Differential thermal analysis and thermogravimetric analysis, mass spectrometer for gas analysis, surface area and pore volume analyzer, gas liquid chromatograph, modern spectroscopic equipment.

2. Engineering:
(a) General mechanical testing and small scale structural testing.
(b) Thermal testing.
(c) Acoustic and vibration laboratory testing and field surveys.
(d) Experimental stress analysis being strain gauge and photoelastic methods.
(e) Hydrostatic testing to 10,000 p.s.i.
(f) Hydraulic flow tests.
(g) Electronic equipment and circuit development and testing audio through radio frequencies.
(h) Instrument development, testing, and calibration.
(i) Airflow testing including AFI standard tests on air filter media.
(j) Corrosion Laboratory testing and field measurements.
(k) Combustion development and testing.
(l) Solid and liquid waste treatment studies, laboratory and pilot scale testing.

These activities are supported by a team of industrially oriented specialists in the fields of structural stress and thermal analysis, aerodynamics, thermodynamics and statistical analysis and in electronic, electromechanical and mechanical design and development.

3. Metallurgy:
(a) Metallographic Laboratory (includes facilities for high temperature studies).
(b) Metallurgical Laboratories (Process Metallurgy & Ore Dressing).
(c) Physical Testing Laboratories.
(d) Complete Pilot Plant services for ore-dressing, roasting, smelting, dry magnetic separation, etc.
(e) Powder Metallurgy.
(f) X-Ray Spectrographic & X-Ray Diffraction Laboratory.
(g) Ultrasonic Applications - studying means of applying high power ultrasonic energy to industrial processing.

4. Physics:
(a) X-Ray microanalyzer (AEI Model SEM2A).
(b) Scanning electron microscope (Cambridge Scientific Instruments Model S-4).
(c) Transmission electron microscopes (Siemens v JEM).

(d) Mass Spectrometer Helium Leak Detector (NRC Model 925).
5. Textiles: General Textile Service Laboratory (physical testing of yarns and fabrics, fibre identification, detergent evaluation, carpet testing, static and flammability testing, performance specifications for uniforms, etc.).

A number of leaflets describing the various departments are also available.

Commercial Testing Laboratory

PENGALTA RESEARCH AND DEVELOPMENT LTD.
4425 - 64 Avenue S.E.
Calgary, Alberta
T2C 2C8

279-6149
T.B. Kimmel, General Manager.

Research and development services include modelling, design, testing and development of systems and equipment for hydrocarbon extractive, processing and transportation industries through the engineering laboratory, prototype and pilot plant phases.

Commercial Testing Laboratory

PENNELL GEOTECHNICAL ENGINEERING LTD.
6039 - 6 Street S.E.
Calgary, Alberta
T2H 1L8

259-4585
Douglas G. Pennell, President.

This is a consulting geotechnical engineering firm providing services in foundation design, earth structures, slope stability, and laboratory soil testing.

Government Testing Laboratory

PETROLEUM RECOVERY INSTITUTE
3512 - 33 Street N.W.
Calgary, Alberta
T2L 2A6

282-1211
Mr. J. Maybin, Executive Director.

The equipment of the department is primarily for research purposes. The department has the following specialized equipment and facilities: gas chromatography, ion chromatography, high-pressure liquid chromatography, UV and visible spectrophotometry, scintillation counter, moisture content measurements, measurement of rheological properties, Abbe refractor, mercury porosimeter, and three-phase relative permeability.

Commercial Testing Laboratory

PLAINSMAN CLAYS LTD.
Box 1266
Medicine Hat, Alberta
T1A 7M9

527-8535
Mr. Tony Hansen, Research and Development.

Plainsman's testing programs are related primarily to the company's own needs. In some circumstances, assistance is available to other clay users.

Commercial Testing Laboratory

PRAIRIE AGRICULTURE MACHINERY INSTITUTE
Lethbridge Community College Campus
Lethbridge, Alberta
T1K 1L6

329-1212
E.H. Wiens, Manager, Senior Engineer.

PAMI basically tests farm machinery. Evaluation of the functional performance of current production machines in typical prairie operating conditions is a major part of the Institutes work. Some of the services available include:

1. Field testing of machines with mobile field laboratories
2. Dynamic field simulation lab
3. Durability testing
4. Experimental stress analysis
5. Component design and testing
6. Data analysis and specialized computer design techniques

Commercial Testing Laboratory

PROTECH LABORATORIES
3851 B - 21 Street N.E.
Calgary, Alberta
T2E 6T5

230-1737
Bill Wong

Protech is in the process of setting up to do analysis on air and natural gas samples.

Protech also does water treatment consulting work and supply the water treatment equipment both in domestic and commercial sections.

Commercial Testing Laboratory

QUALITY STEEL FOUNDRIES LTD
10340 - 58 Avenue
Edmonton, Alberta
T6H 1B5

434-7565
Dwight Adamic, Plant Manager.

Special equipment: tensile tester, charpy impact tester, Jarrell-Ash 750 Atomcomp Spectrometer, Wilson Rockwel Tester, Brason Ultrasonic tester.

Private Testing Laboratory

R. ANGUS ALBERTA LTD.
16900 - 107 Avenue
Edmonton, Alberta

483-3636
Mr. Fred Borle, Laboratory supervisor.

A preventive maintenance scheduled oil sampling program is available to R. ANGUS customers for determining engine condition by analyzing lubricating oil for wear particles. Oil samples are also checked for fuel dilution, water, and antifreeze.

Commercial Testing Laboratory

RAE INSPECTION SERVICE (1979) LTD.
2, 9734 - 51 Avenue
Edmonton, Alberta
T6E 0A6

434-8507
Mr. R. Tatz, President.
Mr. R.A. Eagen, Manager.

The major activities of this company are concerned with on the job inspection of surface preparation and application of paints and coatings including flame spray applications and rubber lining systems. Inspection of existing paint systems to determine failures and extent of deterioration. Service includes cathodic installation.

Instruments are completely portable and are used solely for making field tests.

Private Testing Laboratory

RAYLO CHEMICALS LTD.
8045 Argyll Road
Edmonton, Alberta
T6C 4A9

469-7601
Dr. G. Tertzakian, President.

Raylo Chemicals Limited offers the services of highly qualified scientists supported by excellent laboratories, pilot plant and manufacturing facilities.

Contract research in the general field of chemistry. Raylo Chemicals Limited has established an enviable record for innovation, conducting research for a wide variety of problems ranging from natural products and chemistry, to the physics of reacting systems. Expert in pilot plant design and operation, high pressure reactions, polymerization, and non-routine analysis. All research is conducted on a confidential basis.

Custom synthesis requiring complex chemistry of fine chemicals and specialty polymers - ranging in quantity from five grams to several thousand kilograms. Facilities include a versatile plant, staffed with professionals and supported by a dedicated technical group for process development and improvement.

More than 100 fine chemicals, notable for purity and variety of structure, are manufactured by Raylo Chemicals Limited and available from stock.

Commercial Testing Laboratory

RIVEST BROS. ENTERPRISES LTD
2220-80 Avenue
Postal Station L
Edmonton, Alberta
T6P 1N2

467-6630
Mr. S. Rivest, President - Manager.

This company does non-destructive testing of pipeline welding, pressure vessels, structural steel and various types of metal fabrication.

Commercial Testing Laboratory

SEREDA CONSULTANTS LTD.
5418 - 97 Street
Edmonton, Alberta
T6E 5C1

437-3276
Mr. D.R. Sereda

Services include: granular materials quality assessment, testing of materials for quality and specification compliance, and product development testing.

Private Testing Laboratory

SHELL CANADA LTD.
Geological Laboratory

4500, 8A Street N.E.
Calgary, Alberta
T2E 4J7

276-8466
Mr. I. van der Ver, Laboratory Supervisor.

No commercial testing is done, but facilities are available for geochemistry, metallurgy, chemical and physical test on core, formation oil and water samples.

Private Testing Laboratory

SHELL CANADA RESOURCES LTD.
Exploration and Development Laboratory
2223 Centre Street North
Calgary, Alberta
T2E 2T4

232-3990
Noreene L. Johnson, Laboratory Supervisor.

No commercial testing is done, but facilities exist for geochemistry, metallurgy, chemical and physical tests on core, formation oil and water samples.

Private Testing Laboratory

SHERRITT GORDON MINES LTD.
Sherritt Research Centre
Services Laboratory
Fort Saskatchewan, Alberta
T8L 2P2

998-6911
Dr. B. Meddings, Manager.

The Company's main products are nickel and cobalt in powder, briquette or strip form, and chemical fertilizers.

This laboratory facility is concerned with quality and production control over these products, as well as with the constant monitoring of effluents and emissions from the plant. Of equal importance is the analytical work performed for the Research and Development Division which is continuously striving to improve the Company's production and capabilities.

Equipment on hand enables quantitative determination of a large number of elements in a variety of materials.

Routine and special equipment includes:

1. Atomic absorption spectrophotometers.
2. Gas chromatographs.
3. Emission spectrograph.
4. X-ray fluorescence spectrometer.
5. Combustion analytical equipment.
6. Fire Assay Furnace.
7. Induction Coupled Argon Plasma Spectrometer

Government Testing Laboratory

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Chemistry Department
1301 - 16 Avenue N.W.
Calgary, Alberta
T2M 0L4

284-8442
Mr. D.A. Clarke, Head.

This is a fully equipped laboratory for instruction in general quantitative and qualitative chemical analyses. Commercial testing is not normally done in this department. However, under special circumstances certain work may be undertaken providing facilities are available, and if the test cannot be performed by a commercial testing agency.

Government Testing Laboratory

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Materials Testing Laboratory
Aeronautical - Mechanical Department
1301 - 16 Avenue N.W.
Calgary, Alberta
T2M 0L4

284-8421
Mr. G. Seale, Head.

Most of the equipment here is for demonstration purposes with students. However, tests that cannot readily be performed elsewhere are accpted. Modern equipment is available for testing the physical properties of metals, including strengths, hardness, and microcrystalline structure. A 400,000 lb. universal testing machine is available here.

Special equipment: "Tinius Olson" Model Super-L Universal Testing Machine, for compression and tension tests. (400,000 lb. Maximum, 12" stroke, 6-1/2' vertical clearance, and has automatic recorder attachment). "Sonntag" Universal Testing Machine, for compression, tension and bending tests, 60,000 lb. maximum; Sonntag Impact Tester; "Avery" Fatigue Tester, 1120 RPM, 8 to 250 ft-lb. range; "Riehle" Brinnel Hardness Tester, 500 to 3000 kgs range; "Tinius Olson" Torsion Tester, 10,000 in-lb., maximum sample 1"; "Tukon" Model F.B. Microhardness Tester, 10 to 36,000 gm. range, 3-1/2" vertical cap; "Wetzler" Metallurgical Microscope, 1000X maximum; "Bausch and Lomb" Metallurgical Microscope, 500X maximum; "Reichert" Metallurgical Microcamera, 1680X maximum; Baldwin SR-4 Strain Indicator; Portable scleroscope, for hardness tests; "Buehler" Mounting Press for metallurgical specimens; "Buehler" lapping wheels for polishing specimens. (Fine, Medium, and Coarse); Electric furnace (300 degrees F. for one hour or 2400 degrees F. for four hours maximum).

Government Testing Laboratory

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Mathematics, Physics Department
1301 - 16 Avenue N.W.
Calgary, Alberta
T2M 0L4

284-8432
Mr. L.R. Tetarenko, Head.

This area has a fully equipped environmental laboratory for instruction in air and water sampling and analysis. Commercial testing is not normally done in this department. However, under special circumstances, certain work may be undertaken providing facilities are available, and if the test cannot be performed by a commercial testing agency.

Government Testing Laboratory

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY
Structures Department
1301 - 16 Avenue N.W.
Calgary, Alberta
T2M 0L4

284-8601
Mr. M. Larson, Head.

This laboratory is equipped to conduct most physical tests on soils, portland cement concrete, asphalts and asphaltic concretes. Most of the equipment is used for student instructional purposes but tests will be performed if they cannot be readily carried out by commercial testing laboratories.

Private Testing Laboratory

STELCO INC.
P.O. Box 2348
Edmonton, Alberta
T5J 2R3

468-1133
Mr. D.A. Ashley, Metallurgical Superintendent.

The Company's equipment and facilities are intended primarily for quality control and research in steel making and processing. Commercial testing is performed only where the service is not readily available elsewhere.

Facilities include complete spectrographic analysis of all elements in steel, all physical testing associated with steel and electromagnetic, ultrasonic, and fluoroscopic non-destructive testing in specialty applications.

Commercial Testing Laboratory

SUPERINTENDENCE COMPANY (CANADA) LTD.
7020 Farrell Road S.E.
Calgary, Alberta
T2H 0T2

253-7785
Mr. D. McCool, Vice-President, General Manager.
Mr. K. Stankievech, Manager.

This company is equipped to perform all phases of nondestructive testing with specialization in pipeline radiography, plant and refinery construction, corrosion inspection and radiographic film reductions.

Private Testing Laboratory

SYNCRUDE RESEARCH CANADA LTD.
Highway 16A & 17 Street
P.O. Box 5790, Postal Station L
Edmonton, Alberta
T6C 4G3

464-8411
Mr. R. Schutte, Director.

No commercial testing for fee is done. Facilities exist for chemical and physical examination of bituminous sands, bitumen, water, etc. Laboratories and pilot plants exist for research and development associated with tar sands processing and bitumen upgrading.

Commercial Testing Laboratory

TERRAMIN RESEARCH LABS LTD.
14, 2235 - 30 Avenue N.E.
Calgary, Alberta
T2E 7C7

276-8668
David J. Koop, President.
Yvonne Hazeldene, Vice-President.

TerraMin is a wholly Canadian owned company extablished to provide analytical services for the mineral exploration industry. It has comprehensive facilities and modern state-of-the-art instrumentation to give rapid, accurate data in areas of rock geochemistry, base metal, uranium and precious metal geochemistry, and heavy mineral separations. Extensive quality control procedures ensure accurate data.

Private Testing Laboratory

TEXACO CANADA INC.
P.O. Box 669
Edmonton, Alberta
T5J 2K8

468-6881
Mr. W.R. Phalen

Laboratory does testing on crude - intermediate - final products. Do tests on refining to blending stages. Facilities exist for development work and quality control.

Commercial Testing Laboratory

THURBER CONSULTANTS LTD
3, 6120 - 11 Street S.E.
Calgary, Alberta
T2H 2L7

253-9217
Mr. L.B. Smith, P. Eng., Branch Manager.

This laboratory has basic soil testing facilities for geotechnical and geological engineering investigations. The laboratory is equipped to carry out the following test:

1. All routine engineering soil classification tests
2. Water content
3. Atterberg limit (liquid plus plastic) tests
4. Sieve analysis

5. Hydrometer analysis
6. Compaction tests
7. In-Situ Density tests
8. Field Vane Shear tests
9. Logging and sampling of test holes and test pits

Commercial Testing Laboratory

THURBER CONSULTANTS LTD
10509 - 81 Avenue
Edmonton, Alberta
T6E 1X7

432-1460
Dr. P. K. Chatterji, P. Eng., Branch Manager.
Mr B. Peterson, P. Geol., Technical Services Manager.
Mr. H. Barnes, C.E.T.,Chief Laboratory Technologst..

Commercial laboratory with comprehensive soil and rock testing facilities for geotechnical and geological engineering investigations . The laboratory has handled major testing programs for design of dams, open-pit mines, tunnels, and other major civil engineering projects. The laboratory is equipped to carry out the following tests:

1. All routine engineering soil classification and index tests.
2. Determination of soluble sulphate content.
3. Unconfined and confined compression tests.
4. Consolidation and swelling tests.
5. Compaction tests.
6. In-situ density tests, field compaction control and construction supervision.
7. Installation and monitoring of field instrumentation including ground movement indicators, piezometers, settlement gauge, thermistors, strain guages, and multipoint extensometers.
8. Field vane shear tests, logging and sampling of test holes and test pits.
9. Low and high pressure triaxial testing on cylindrical samples of soil and rock varying in size up to a maximum of 6 inches in diameter by 12 inches in height. Confining pressures up to 500 psi can be employed in such tests.
10. Reversal direct shear tests on samples ranging in size up to a maximum of 4 inches by 4 inches. Normal loads up to 1000 psi can be applied depending on the size of the sample.
11. Standard rock quality tests for aggregates, and rock cores.
12. Computerized data acquisition system for all laboratory tests.

Private Testing Laboratory

TOWER PAINT AND LABORATORIES LTD
15846 - 111 Avenue
Edmonton, Alberta
T5M 2R8

451-3830
Mr. G.S. St. Laurent, Vice-President.
Mr. L. St. Laurent, Plant Manager.

Lab facilities are mainly intended for quality control of company's paint manufacturing. Some research is done on the products.

Equipment: Gloss meter, vicosity meter, biddle film applicator, scrubability machine, hegman grind gauge, oven for testing hardness quality of baking enamels, light box, microscope, pH meter, magnetic film thickness gauge, Bowers Lab Dispenser.

Commercial Testing Laboratory

TRAVIS CHEMICALS
Division of Reichhold Ltd.
Laboratory Services
3124 - 54 Avenue S.E.
Calgary, Alberta
T2C 0A8

279-2213
Diane Ottley, Lab Supervisor.

Travis can do tests on air pollution, antifreeze, boiler and feedwater, common water, finished petroleum products, corrosion, crude petroleum, and oilwell water.

Commercial Testing Laboratory

UNDERWOOD MCLELLAN LTD.
2540 Kensington Road N.W.
Calgary, Alberta
T2N 3S3

283-4961
Mr. D. Martin, P.Eng., Earth Sciences Department Head.

This laboratory is equipped to do most physical tests on soils, asphalt and concrete. A professional staff is available for design and field control testing. In addition mobile field laboratories are available for on-site testing of major construction projects.

The Company also has permanent lab facilities at Medicine Hat, Brooks, and Red Deer.

Commercial Testing Laboratory

UNDERWOOD MCLELLAN LTD.
P.O. Box 211
Medicine Hat, Alberta
T1A 8A7

527-3183
Mr. David Lasko, Laboratory Supervisor.

This laboratory is equipped to do most physical tests on soils, asphalt and concrete. A professional staff is available for design and field control testing. In addition mobile field laboratories are available for on site testing of major construction projects.

Private Testing Laboratory

UNION CARBIDE CANADA LTD.
4306 - 10 Street N.E.
Calgary, Alberta
T2E 6K3

276-2231
Mr. I. MacNaugton, Laboratory Supervisor.

No commercial testing is done. The testing performed is part of the firm's technical service to the gas Processors in the West.

1. Testing of gas treating solutions (aqueous solutions) includes:
    a) Monoethanolamine
    b) Diethanolamine
    c) Disopropanolamine
    d) Dehydration Glycols
2. Testing of thermofluids

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Chemistry
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3514
Mr. D.J. MacKenzie, Senior Professional Officer.

This laboratory is not set up for commercial testing and will not accept testing if commercial facilities are available. Any work done will be charged for according to consulting rates.

Special Equipment: U.V., Visible I.R. and Raman spectrophotometry, mass spectrometry, X-ray diffraction, N.M.R. and E.S.R. spectroscopy, gas chromatography, polarography, O.R.D. spectroscopy.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Food Science
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2P5

432-3236
Mr. D.C. Paradis, Proffesional Officer.

Basically have access to the facilities and expertise necessary to perform most microbiological, chemical, and physical test of food. However, do not as a rule perform routine testing for the public.

A pilot plant facility includes a freeze drier, spray drier, drum drier, vaccum evaporator, climbing film evaporator, fluidized bed drier, cryogenic simulator, heat exchanger, extruders, retorts cheese vat and press, vacuum packaging equipment, and a flour mill. Analytical equipment includes texture and viscosity devices, fermentors, an ultracentrifuge, UV, IR, and AA spectrophotometers, flame photometer, calorimeter, NMR spectrometer, gas-liquid chromatographs, electrophoresis apparatus, taste-panel facility, temperature gradient incubator, controlled-environment chambers and a computer terminal. In addition, the department has access to a scanning electron microscope and other research facilities on campus.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Genetics
G216, Biological Sciences Center
Edmonton, Alberta
T6G 2E9

432-5361
Dr. R.D. Mehta, Head.

Microbiological assays for detecting potential mutagens and carcinogens in the environment: water, air, food, pharmaceuticals, insecticides, herbicides and industrial pollutants.

Special equipment: Centrifuges, high pressure liquid chromatograph, light microscopes, spectrophotometers, pH meters.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Industrial and Vocational Education
ED Building I, Room 633
87th Avenue and 114th Street
Edmonton, Alberta
T6G 2G5

432-3678
Dr. H.D. Tichenor, Chairman.

No commercial testing is done in this Department. Equipment is primarily for educational and instructional purposes. Basic tests of physical properties are performed on a variety of materials. In addition, tests are performed on electrical and electronic components, hydraulic components (up to 40 gpm at 5000 p.s.i.) and power sources (from 1 to 400 horsepower on internal combustion engines).

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Microbiology
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3277
Dr. D.W. Westlake, Chairman.

The Department's equipment and facilities are primarily intended for instruction and research in microbiology. Staff members are prepared to engage in consulting and research in a wide variety of both fundamental and applied problems (particularly those associated with the petroleum, meat packing and pharmaceutical industries). Members of the Department are not prepared to undertake commercial testing unless commercial facilities are not available. Any such testing which is accepted will be charged for at consulting rates.

Special Equipment:

1. Searle liquid scintillation counter.
2. LKB - liquid scintillation counter.
3. Gilford Model 200 spectrophotometers with recorders.
4. Beckman Model E ultracentrifuge.
5. Philips Model EM 300 electron microscope.
6. Varian and Hewlett Packard Gas Chromatographs.
7. Waters Liquid Chroatograph.
8. LKB - Luminometer.
9. Beckman Gamma 400 Counter.
10. New Brunswick Fermentors (44L capacity).

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Department of Physics
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-4127
Dr. A. Kamal, Chairman.

The Department's equipment and facilities are primarily intended for instruction and research. Any work done in the Department for private individuals or companies will normally be charged at consulting rates. However, members of the Department are available for consultation, by appointment, in the areas of Nuclear Physics, Geophysics, Theoretical Physics, Solid State Physics and Astrophysics.

Major projects in the Department of Physics are in the fields of nuclear physics, solid state, geophysics, and optical spectroscopy. Qualitative spectrographic analyses can be made and the testing of surface finishes from coarse machined to precision-polished stage can be carried out for metals, plastics and glasses. Mass spectroscopy analysis of solids and gases is available as well as the digitizing of analogue data.

Helium liquefaction and purification arrangements and the purchase of cryogenic fluids (Helium and Nitrogen) can be made through the Department.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Energy Resources Conservation Board
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

439-0107
Mr. D.R. Shaw, Chief Chemist.

This laboratory is concerned with monitoring the quality and frequency of analyses performed on the formation fluids of Alberta. Sections 1005 and 1006 of the Oil and Gas Conservation Regulations set forth the minimal requirements. The laboratory is primarily concerned with analysing sumps, spills, etc., and advising the Board's field officer of other Government Departments regarding the action required.

Special Equipment: Cutler-Hammer apparatus for determination of the gross heating value of a gas (range 900-1500 +/- 2 btu/cu. ft.). A Burrel K-2 chromatographic analyser. A Perkin Elmer's Model 800 dual H2 flame ionization detector, with auxiliary T.C. and electron captive accessories. Equipment for determination of refractive index, vapor pressure, density, viscosity, composition, pour point, flashpoint, etc., of petroleum products, GPM and LPG, and for the W.S. Bureau of Mines standard method of examination of crude oils.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Agriculture, Department of Agricultural Engineering
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-4251
Dr. K.W. Domier, Chairman.

The Department of Agricultural Engineering has the following specialized equipment which is used in the research program: Two non-dispersive infra-red gas analysers (carbon-dioxide and ammonia), dust and bacterial air samplers, soil penetrometer and sheargraph, moveable soil bin for tillage tool studies, hydrogen sulphide sampling unit, data aquisition system - paper punch - thermistor - and analog input, solar radiation - direct and diffuse - sun tracking unit, dew point hygrometer, multi component sensor, soil density meter, wheel slip meter, and drawbar pull meter, hot-wire anemometer, tracer gas detector chromatograph, ultrasonic doppler flow meter (water pipes), low-range differential pressure transducer, ADOO-X Tree Ring Measuring System, DIGI-MIC Tree Growth Analyzer, Compufibre-Fibre Length System.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3320
Dr. P.F. Adams, Dean.

The Faculty of Engineering, as a general policy, does not undertake engineering testing work of a routine nature where commercial facilities exist within the Province for conducting the tests. The facilities of the Faculty are available through arrangement with the individual departments for carrying out special tests of those which cannot conveniently be carried out elsewhere. Such tests are only conducted when and if they can be done without interference with the regular teaching and research work of the department involved. Only University staff are permitted to operate University equipment or carry out tests in the University Laboratories. Charges for tests carried out in the Faculty Laboratories are based on the time devoted to the work by University staff or graduate students at technicians' rates depending upon the nature of the tests, plus materials used plus an overhead charge which reflects the cost of services provided and the value of the test equipment used. Invoices for work are issued by the University on details supplied by the Department. The University does not provide interpretation of test results, this being private. If professional services for the interpretation of test results are required, arrangements may be made with individual staff members for such services.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering, Department of Chemical Engineering
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3571
Dr. F.D. Otto, Chairman.

Special arrangements may be made with the staff of the Department for performing certain selected tests. Facilities exist and are ordinarily available for the following types of tests:

1. Volumetric and phase behaviour of systems containing hydrocarbons and acid gases.
2. Hydrate forming conditions in mixed hydrocarbons.
3. Rheological properties of non-Newtonian fluids including polymers, crude oils and clay or other solid suspensions.
4. Special natural gas analyses.
5. Physical and chemical characterization of catalysts.
6. Reactor performance tests for catalytic sulphur producing chemical reactions.
7. Thermal and catalytic hydroprocessing of gas oils.
8. G.C. Simulated Distillation of hydrocarbon feed stocks.
9. Solubility of acid gases in gas treating solvents.

The equipment required for performing these tests is generally of a specialized type. It includes special viscometry equipment, Weissenberg rheogoniometer, Instron capillary rheometer, high pressure cells, chromatographs, Finnigan mass spectrometer, special mass spectrometer for deuterium analysis, equipment for pore size distribution and surface area measurement, infrared spectrophotometer, differential thermal analysis equipment.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering, Department of Civil Engineering

89th Avenue and 114th Street
Edmonton, Alberta
T6G 2G7

432-5119
Dr. D.W. Murray, Chairman.

The Department has specialized equipment for testing in the areas of materials, soil and rock, hydraulics, structures, and environmental sciences. This equipment is normally used for teaching and research purposes but, if it can be established that comparable commercial facilities are not available, testing for industry may be carried out on a fee basis. Inquiries can be directed to the Department Chairman.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering, Department of Electrical Engineering
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3333
Dr. C. R. James, Chairman.

The Department has only a limited amount of equipment available for commercial testing, but is in the position to undertake High Voltage 60 cycle testing up to 300 KV, RMS, Resistivity and Conductivity testing, D.C. Instrument Checking, A.C. Instrument Checking at 60 and 400 cycle. Recording equipment for transient phenomena-microseconds to minutes exists in the Department and these include a Westinghouse 7-element oscillograph, Tektonix scopes for pulse recording. The remaining equipment is of a scope to enable general electrical investigation work to be undertaken by the staff.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering, Department of Mechanical Engineering.
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3328
Dr. D.G. Bellow, Chairman.

The Department is prepared to carry out a variety of tests under the general guidelines put forth for the Faculty of Engineering.

Materials Testing Equipment: Three universal testing machines with capacities to 400,000 lbs. and with environmental chambers for high and low temperature testing. Two axial fatigue testing machines with a capacity to 20,000 lbs. and three shaker tables for vibration testing. A Charpy impact tester, drop weight tear tester, microhardness tester, optical comparator and roughness measuring equipment. Three photoelastic systems and strain gauge instrumentation for stress analysis.

Thermodynamic and Aerodynamic Equipment: Apparatus for thermal conductivity and thermal radiation spectrum analyses. Solar simulator and optical pyrometers. Three wind tunnels with test section areas ranging from 1 to 32 feet squared for subsonic testing, and a supersonic blowdown facility. A flow visualization channel. A low temperature FROST tunnel for freezing and thawing studies. An ice-water tunnel for underwater ice.

Sound and Vibration Equipment: Sound generation and recording equipment including sound sources and tape recorders, audio spectrum analysers and recorders. Standing wave apparatus for testing acoustic properties of materials. Vibration measuring and recording equipment.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Faculty of Engineering, Department of Mineral Engineering
92 Avenue and 116 Street
Edmonton, Alberta
T6G 2E2

432-3454
Dr. V. Plitt, Chairman.

The laboratories of the Department serve the areas of Mining, Petroleum and Metallurgical Engineering. The facilities are normally in full time use for teaching and research and additional laboratory work may only be performed if it cannot be done commercially. The facilities of the Department are grouped in the following laboratories: Comminution, Particle Size Analysis, Minerals Benficiation, Coal Research, Rock Mechanics, Petroleum Core and Fluid Analyses, Petroleum Reservoir Engineering, Petroleum Secondary Recovery, Extraction of Heavy Crude, Surface Chemistry, Pyrometallurgy, Metallography, Physical Metallurgy, Metal Forming, Corrosion and Oxidation, Scanning Electron Microscopy.

Government Testing Laboratory

UNIVERSITY OF ALBERTA
Nuclear Research Centre
89th Avenue and 114th Street
Edmonton, Alberta
T6G 2E2

432-3637
Dr. G.C. Neilson, Director.
Mr. J.B. Elliott, Professional Officer.

The Nuclear Research Centre is primarily a research oriented laboratory and is not able to undertake routine testing.

The laboratory has available the following research equipment:

1. High resolution Gamma-ray spectrometers, e.g. GeLi, NaI detectors, etc.
2. A 7.5 MeV accelerator for accelerating protons, deuterons, or Helium nuclei. with on-line computing facilities.
3. Capability of producing short lived isotopes, e.g. 13N, 15O, 18F, etc.
4. High resolution neutron activation analysis system.
5. Design and production of fast electronics used in nuclear detectors and interfacing of on-line computing facilities.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Chemical Engineering
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5751
Dr. E.L. Tollefson

Special arrangements may be made with the staff of the department for performing certain selected tests. Facilities exist and are ordinarily available for the following types of tests:

1. Rheological properties of non-Newtonian fluids
2. Volumetric and phase behavior of systems.
3. Atomic absorption spectrophotometry.
4. Total organic carbon analysis.
5. Carbon, hydrogen, nitrogen analysis.
6. Gas chromatography, thermoconductivity, and hydrogen flame.
7. Spray dryer.
8. Sieve analysis.
9. Surface tension measurements.
10. Surface area measurement on solid particulates.
11. Porosity measurement on solid particulates.
12. Coulter counter particle size distributions.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Civil Engineering
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5820
Dr. M.A. Ward, Head.

The laboratories are equipped with the following:

Cambridge Scanning Electron Microscope with computer controlled microprobe and energy dispersive attachments, X-ray diffraction equipment, Differential thermal analysis equipment, 2.MN. M.T.S. programmable loading system, 2.MN. Amsler compression machine, 2.MN. Amsler flexture machine, 500 kN Riehle universal test machine, 6.7 MN. Forney compression machine, concrete mixing, curing and testing equipment, ultrasonic tester, impact tester for Charpy and Izod tests, 10,000 lb. torsion machine, hardness tester for Brinell and Rockwell hardness tests, 100 channel automatic strain recording equipment and other data acquisition facilities for dynamic measurements, two environmental chambers and a walk-in cabinet for cold temperature tests, standard asphalt tests including resilient modulus, soils testing facility including a Hardin oscillator, H.P. Model 5423A structural dynamics analyzer, specialized equipment for air photo interpretation and terrain analysis.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Department of Chemistry
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5890
Dr. R. Yamdagni, Chemical Instrumentation Laboratory Supervisor, ph 284-5359.

The equipment in the Department is primarily for instruction and research. However, special tests may be carried out at consulting rates if commercial facilities are not available.

The Department possesses research equipment designed to handle projects in the following areas: Spectroscopy (infrared, visible, ultra-violet, Raman, nuclear magnetic resonance, electron spin resonance, atomic absorption). Mass-spectrometry, gas chromatography, x-ray crystallography, preparative and structural inorganic, organic and organo-metallic chemistry, radiation chemistry, solution phenomena, properties of ionic solutions, gas phase and solution kinetics, polymer studies, natural product chemistry, sulphur chemistry, theoretical chemistry, enzymology, metabolic studies, muscle biochemistry, phospholipid metabolism, membrane function, molecular radiation biology, and protein chemistry.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Department of Physics
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5385
Dr. L. Cogger, Administrative Officer.

The equipment of this department is intended mainly for instruction and research. The staff normally welcomes the opportunity to liaise with industry. Tests may be carried out at consultant rates if commercial facilities are not available.

The department possesses equipment to handle projects in the following areas:

Astronomy (16 inch telescope equipped with photometer and spectograph) atmospheric spectroscopy from balloon altitudes, aurora and airglow using low light level imaging and processing, mass spectrometry and stable isotope analysis of gases and liquids, EPR spectroscopy of transition-metals in lanthanide ions in solids, liquids and biological materials, x-ray diffraction studies of crystalline materials, nuclear radiation detection, acoustic sounders and tethersonde, biophysics, lasers, quasi-elastic light scattering and diffusion measurements, theoretical computations of physical problems, vacuum technology and solid state electronics.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Electrical Engineering
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5806
Dr. G.S. Hope, Head.

The department has the following specialized equipment and facilities:

1. Shielded room

2. Micro alternator, approximately 1/100,000 scale model (electrically) of a conventional turbo alternator for simulation studies at the 3 KVA level.

3. Fourier Analyser, a special purpose computer for spectral analysis and system identification.

4. Dead weight pressure calibration system. Pressure gauges up to 10,000 psia can be calibrated in the temperature range from -40 degrees C. to 125 degrees C.

5. Temperature Calibration Facilities (-25 degrees C. to 50 degrees C.) to an accuracy of plus or minus .01 degrees C.

6. Electrical Meter Calibration Facilities - voltage and current from 50 Hz to 10 KHz.

7. Electrical Noise Measurement Equipment - for spectral analysis of electrical noise phenomena.

8. Network Analyzer and Spectrum Analyzer Equipment - subaudio to 18 GHz for measurement of signal processing system transfer functions.

9. DC Dynamometer Equipment - 10 KW to simulate various types of loads, such as light rapid transit, windmills, pump loads, etc.

10. 500 KV 3-phase Transmission Line Model 500 Km length for studies relating to transmission line protection.

11. A Variety of Microprocessor Development Systems.

12. Minicomputer and Graphics Facilities for the display of one- and two-dimensional images.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Faculty of Engineering
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5731
Dr. T.H. Barton, Dean.

The Faculty of Engineering, as a general policy, does not undertake engineering testing work of a routine nature where commercial facilities exist within the Province for the conduct of the tests. The facilities of the Faculty are available through arrangement with the individual departments for carrying out special tests or those which cannot conveniently be carried out elsewhere. Such tests are only conducted when and if they can be done without interference with the regular teaching and research work of the department involved.

No one but University staff is permitted to operate University equipment or carry out tests in the University Laboratories. Charges for tests carried out in the Faculty are based on staff time, plus materials used and an overhead charge which is normally 50 percent of the time and material charge. Invoices for work are issued by the University on details supplied by the department concerned.

Government Testing Laboratory

UNIVERSITY OF CALGARY
Mechanical Engineering
2500 University Drive N.W.
Calgary, Alberta
T2N 1N4

284-5770
Dr. P.G. Glockner, Head.

Arrangements can be made through the Department to conduct certain kinds of specialized tests. The following facilities and equipment, normally used in teaching and research, can be made available:

1. Gas analysis - engine exhaust gas analysis.
2. Test engine - knock rating of fuels.
3. Flammabilitly Apparatus - Flammability of fuels and laminar flame velocities.
4. Calorimeter - calorific value of fuels.
5. Explosive test facility - properties of explosives, explosive and impact welding.
6. Wind tunnels - wind flow patterns around scale model buildings and resultant pressures on building surfaces, - dispersion of air pollutants.
7. Water flume - simulation of snow drifting and build-up around scale model of building as function of wind velocity and snowfall.
8. Stress analysis equipment - photoelastic, moire strain gauge methods.
9. Noise and vibration analysis - general instrumentation, frequency analysis, electrodynamic shaker for vibration testing.
10. Relative Burning Characteristics of Various Fuels and their Mixtures.
11. Various Characteristics of the Behaviour of Oil Sand Fragments in Gaseous Streams.
12. Thermal Conductivity Measurements of Oil Sands.
13. Tenney Ten Environmental Chamber for research on ice, reinforced ice and problems dealing with cold regions.
14. Research on stability of inflatables and the optimum design of cable reinforced air-supported structures.
15. Mechanical and optical (transmissivity) properties of various translucent plastic materials suitable for greenhouse coverings and their degradation due to exposure to the elements.
16. Subsidence analysis in the Alberta Foothills Regions due to a large-scale underground coal-exploration.
17. Reinforced ice-domes as temporary enclosures for the north.

Government Testing Laboratory

UNIVERSITY OF LETHBRIDGE
Department of Chemistry
4401 - University Drive
Lethbridge, Alberta
T1K 3M4

329-2301
Dr. K.G. McCurdy

Undertakes limited inorganic analysis on request. No facilities for organic analysis.

Special Equipment: Atomic Absorption, spectraphotometer, calorimeter-differential scanning.

Private Testing Laboratory

WESTERN CO-OPERATIVE FERTILIZERS
P.O. Box 110
Medicine Hat, Alberta
T1A 7L6527-7761 Mr. J.S. Gallagher, Manager, Technical Services.

Laboratory facilities are strictly for use by Western Co-Operative Fertilizers, used basically for quality control purposes. The analyses performed include P2O5, N2, Cl, various physical tests including particle size distribution and hardness, and checks on the raw material and final product.

Commercial Testing Laboratory

WESTERN INDUSTRIAL LABORATORIES LTD.
8109 - 102 Street
Edmonton, Alberta
T6E 4E4

433-6362
Mr. L.L. Alexander, Manager.
Mr. F. Harrison, Chief Chemist.

This laboratory undertakes consultation and general chemical analysis including sampling and analysis of industrial wastes and sewage and complete water analysis.

This laboratory operates its own microbiological laboratory and offers chemical and microbiological analysis of produced oil field waters and waters for oil field water flood purposes. A complete service is offered for air pollution monitoring by fixed stations.

Special Equipment: Leco induction furnace. Equipment for general chemical analysis. Equipment for waste analysis according to A.P.H.A. methods. Flocculations (jar test) equipment for setting up and control of water treatment. Microbiological laboratory equipment including binocular microscope. Equipment for fixed station air pollution monitoring, Baush and Lomb Spectronic 20, Baush and Lomb Spectronic 21 and Orion specific ion electrode equipment.

Commercial Testing Laboratory

WESTERN INSPECTION LTD
Box 5183, Station A
Calgary, Alberta
T2H 1X3

252-6694
Mr. D.A. Belanger, Manager.

This firm performs non-destructive testing utilizing gamma-ray, x-ray, ultrasonic (weld inspection, corrosion, and thickness measurements), magnetic particle and dye penetrant inspection as well as visual inspection.

This company specializes in piping and vessel fabrication shops, plant inspection, cranes and structural steel. All equipment for above testing medium is portable.

Special Equipment:

1. 330KV 9MA 360 degree 100% Duty Cycle X-Ray Unit complete with hydraulic tube stand. Ideal for pressure Vessel work. Capable of penetrating up to 3 inches of steel.
2. Automatic Industrial Film Processing Unit, capable of processing large volumes of film giving consistent quality at very rapid speed.
3. High intensity viewers for film inspection.

Commercial Testing Laboratory

WESTERN INSTRUMENTS LTD.
P.O. Box 8729, Station L
Edmonton, Alberta
T6C 4J5

465-6527
Mr. L. Faulks, General Manager.

Custom instrument design and development in electrically related areas and non-destructive testing systems.

Distribute non-destructive testing equipment and supplies as well as general instrumentation supplies.

Commercial Testing Laboratory

WESTERN RESEARCH
Division of Bow Valley Resource Services Ltd.
1313 - 44 Avenue N.E.
Calgary, Alberta
T6E 6L5

276-8806
Mr. J. Lukacs, Vice President.

The company offers laboratory, consulting and technical services in such areas as environmental engineering, air quality monitoring, meteorology, process emission measurement, process performance testing and applied research. More specific areas of capabilities are: industrial site selection, environmental impact assessment, noise pollution assessment, industrial hygiene, socoieconomic impact evaluation, air quality monitoring, diffusion meteorology, stack emission testing, process performance testing and process evaluation and diagnosis.

Commercial Testing Laboratory

Division of Bow Valley Resource Services Ltd.
9850-41 Avenue
Edmonton, Alberta
T6E 5L6

463-9335
Mr. J. Brigans

Western Research and Development is a multidisciplinary consulting company applying specialized engineering and scientific skills to environment and process problems for industry and government. The Edmonton branch specializes in ambient air monotoring.

Private Testing Laboratory

WIK AND HOEGLUND (CANADA) LTD.
1811 - 66 Avenue
Box 5617, Postal Station L
Edmonton, Alberta
T6C 4G1

464-4134
Mr. I. Robertson, Laboratory Supervisor.

No commercial tests are performed. Tests are made on raw materials and finished products as well as differences in materials between ingredient and finished product stages. This plant produces polyethylene pipe.

Equipment and facilities include - proLifo meter, plastic density measurement, controlled temperature laboratory and pressure testing of pipe to 80 degrees Celsius.

Commercial Testing Laboratory

WIMPEY LABORATORIES TECHNICAL SERVICES
6720 - 30 Street
Box 5768, Station L
Edmonton, Alberta
T6C 4G2

465-5317
Mr. P. Ellis, Lab Manager.
Mr. P. Johnson, Building Science Consultant.

The company operates an acoustical laboratory and is equipped to do a variety of acoustical field measurements. Acoustical tests that can be carried out are:

1. Measurement of sound power
2. ASTM measurement of absorption coefficients
3. Measurement of reverberation time
4. Analysis of noise into octave, one-third octave, and 6% band widths
5. Tape recording of noise in field and analysis in lab
6. Analysis of vibration into one-third octave down to 2 Hz
7. Impact noise transmission test by means of tapping machine
8. Airborne sound transmission tests between rooms
9. Tuning and balancing of sound systems
10. Measurement of frequency response, distortion
11. Calibration of audiometers
12. Undertaking of noise and vibration surveys anywhere required

Equipment and facilities include:

1. High speed level recorder
2. X-Y plotter
3. Octave, one-third octave band, and 6% narrow band analyzers
4. Audio oscillator
5. Accelerometers with integrating networks
6. Condenser microphones
7. Precision one channel tape recorder
8. Precision sound level meter
9. Two channel broadcasting quality tape recorder
10. One-third octave band equalization filters
11. Reverberation Chamber - 10,093 cu. ft.
12. Reverberation Chamber - 8,000 cu. ft.
